The graph illustrates the external/internal rotation (deg) over the course of a trial, with markers for turning initiation, touch down of the contralateral leg, maximum range of movement, and the stages of jumping, pivoting, and walking. Different conditions are indicated by distinct lines and colors:

- **BRACED CONDITION** (dotted blue line)
- **SLEEVED CONDITION** (dashed red line)
- **UNBRACED CONDITION** (solid black line)

The graph highlights the following stages:

- **Jumping**
- **Landing**
- **Pivoting**
- **Walking**
