Prime Minister's Report To His Majesty On Drafting New Afghan Constitution

DR. Mohammad Yousuf, the Prime Minister on submitting the draft Constitution to His Majesty the King, also presented a report to His Majesty.

In his report the Prime Minister recalled that when at the end of 1341 His Majesty, in accordance with a desire to bring about political and social changes in the country, entrusted to him the post of Prime Minister, the new government was also given the duty of revising and drafting Afghanistan's Constitution.

The Prime Minister's report stated that a Constituent Committee was accordingly set up in March 1963.

The Committee, over a period of one year, held regular meetings to perform its duty and to do so it also obtained the views of a high-ranking French expert of jurisprudence.

Finally the Committee prepared the draft of the new Constitution and delivered it to the Government. The Draft Constitution after being studied by the Cabinet Council, was turned over for further scrutiny to an Advisory Commission consisting of well-informed and knowledgeable persons headed by Dr. Abdul Zahir, President of the Afghan National Assembly.

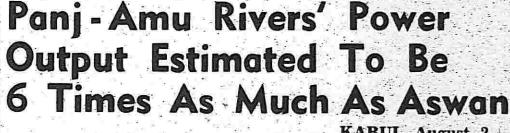

The Advisory Commission after holding 20 sessions finalised, with certain amendments, the Draft Constitution and returned it to the Government. The document was again studied by the Cabinet Council and it was finally adopted at a Cabinet meeting held on July 27th, 1964. "I have the honour", the Prime Minister's report said, "to enclose herewith the final draft of the new Constitution of the country for Your Majesty's information. As Your Majesty had announced in the Royal Proclamation of Feb. 10, 1964 to Your Majesty's subjects, orders may be issued to convene the Loya Jirga at a date and time which Your Majesty may consider suitable. "I hope that the people of Afghanistan would organise and develop their national life under the leadership of their beloved Sovereign and on the basis of the new Constitution in such a way that the great hopes cherished by Your Majesty for the advancement of Afghan society would, by the Grace of God, be realised in the best manner".

KABUL, SUNDAY, AUGUST2, 1964, (ASAD 11, 1343, S.H.)

PartInInternational Water-Study Decade

KABUL TIMES

WASHINGTON, Aug. 2, (Reuter).-The United States hopes 60 countries, including the Soviet Union, will take part in an international water-study decade starting in 1965. President Johnson's scientific adviser. Dr. Donald Hornig, said yesterday.

Dr. Hornig told reporters after a meeting with President Johnson that countries were spending billions of dollars on water projects and research, but the object of the decade was to make a coordinated study of the total hy-

This would involve the establishment of stations and networks throughout the world to measure and track water from rain to the underground water table and eventually back to the atmosphere, a White House announcement said:

Dr. Hornig said the United States was spending about 70 million dollars althoughthis amount would not be increased, some of the research efforts here would be oriented to what scientists in other countires would be doing during the decade.

60 Nations To Take, Britain Asks ICC Members To Arrange Talks Between **3 Feuding Laotion Groups**

R. A. Butler said here Saturday that he has asked India, Poland and Canada to arrange a meeting of rival Laotian factions in suitable neutral territory.

told a 40-minute press conference before leaving for London at the end of a five-day visit of Moscow that he had sent a message to this effect to the Indian government. He was also in touch with Canada about his proposal.

He spoke at the conclusion of "frank and friendly" talks on Laos and other world problems with Khrushchov and Andrei Gromyko, Soviet Foreign Minister. Britain and the Soviet Union agreed during the talks to draw up a consular convention and increase cultural exchanges.

Butler told reporters he earnestly hoped that Britain and the Soviet Union would "find a way to continue our co-operation" over Laos.

"We have no British interests in Laos," he said. "We simply have an interest in not allowing this problem to spread into world war."

Anglo-Soviet co-operation in

EDUCATION DIRECTORS HEAR DR. ANAS ON SCHOOL FACILITIES

KABUL, Aug. 2 .- Dr. Mohammad Anas, the Minister of Education took part in the meeting of the provincial directors of education yesterday to discuss ways and means of expanding educational facilities.

MOSCOW, August, 2, (Reuter) .--

The British Foreign Secretary | Laos over the past 10 years had

twice averted a real threat of war, Butler said.

On Soviet's threat, in a statement last weekend, to withdraw from the co-Chairmanship of the 14-nation Laos conference in Geneva, Butler said, "I sincerely hope they will decide not to."

The three Laotian factions are the neutralist, the right-wing and the Pathet-Lao.

The Pathet Lao leader, Prince Souphanouvong, according to the New China News Agency Saturday, has called for "urgent measures" by Britain and the Soviet Union as co-Chairmen of the Geneva conference to stop "massive military attacks" on areas held by Pathet Lao forces.

In New Delhi official sources said India had not so far received Butler's reported request. The government wanted to study the request before commenting.

India is chairman of the International Control Commission for Laos whose other members are Poland and Canada.

Butler told reporters here that he will keep his contacts with Poland and India to try to arrange a conference of the Laotian partics.

According to Tass the Soviet Union and Britain "are in accord that the achievement of an agreement on the non-proliferation of nuclear arms and the conclusion for this purpose of an appropriate international treaty would be in the interests of peace". This is said in the joint Soviet-British communique signed in connection with the stay in the Soviet Union of Richard A. Butler, Foreign Secretary of Britain. Both sides, the communique points out, "have again confirmed their conviction that the safeguarding of peace in the nuclear age is of primary interest for all states regardless of distinction in their political and social systems. "The common goal therefore, should be patient and constructive talks, aimed at seeking a peaceful and mutually acceptable solution of disputed international problems." A broad exchange of views on international problems had taken place. The sides discussed questions on which exchanges of views are now under way in respect to the consolidation of the United Nations mechanism for maintaining peace. They expressed readiness to take part in the further exchange of views on these questions.

In answer to this report a Royal firman has been issued by His Majesty the King directing the Prime Minister to take the necessary steps for convening the Loya Jirga.

Indonesian Leader Urges Expulsion Of British Consul

DJAKARTA, Aug. 2, (Reuter). —Simpang Ginting, Chairman of the North Sumatra National Front, has called for the expulsion of Colonel J. A. Mackay, British Consul in Medan, capital of the province, because, among other reasons, he had displayed a "haughty attitude", the Antara news agency reported Saturday.

This Ginting said, was "too hard to swallow" for the North Sumatra youths.

Several demonstrations have been held in Medan protesting Colonel Makay's peresence in recent weeks.

He also expressed his appreciation of the reception that was accorded to the Afghan delegation in the USSR.

Explaining the agreement on the joint and multi-purpose exploitation of the waters and energy resources of Panj and Amu rivers, Mr. Etemadi said information available showed that explorations, being under taken on the basis of the agreement reached by the two countries recently, would cover the course and banks of the rivers Panj and Amu along the Afghan-Soviet border and will include aerial photography and topographical, geological, hydrological, hydro-geological and seismographic surveys on different scales.

The purpose of these studies, he stated, is to procure full and comprehensive information for build-

According to preliminary estimates 8 to 10 dams and barrages capable of generating 14 to 16 million kw of water can be built along this strip of the river alone; this is 6-times as much as the output from the Aswan Dam.

Vast possibilities of irrigation on both sides of the river also exist. The area of land which could be irrigated on the Afghan side is estimated at more thanexploratory and planning opera- | of pillars. tions on the scheme would be completed within three and half years with the co-operation of experts from both countries.

The economic and technical report at the end of the surveys would be forwarded to the authorities in both countries for final decision.

The Minister of Education said he was sure that such meetings are useful not only for solving educational and administrative problems in the provinces but also as a medium of guidance for the Ministry in developing education in the country.

Dr. Anas compared the seminar to a school in which the participants learn from each other. He made certain suggestions regarding the expansion of educational facilities in the provinces in accordance with the educational development plans.

The second part of the seminar of the provincial directors of education ended yesterday; the third and final phase of consultations will continue for a few days more.

Sultan Mahmoud Ghazi **Returns From Trip** To Afghan-Sino Border

KABUL, Aug. 2.-Mr. Sultan Mahmoud Ghazi, Chief of the Afghan Air Authority and Leader of the Afghan delegation to the Sino-Afghan Boundary Commission, returned to Kabul yesterday.

He was received at the airport by officials of the AAA and the Ambasador of the People's Republic of China.

Mr. Sultan Mahmoud Ghazi said in an interview that the members of the Afghan and Chinese delegations to the Boundary Commission met at Wakhjir Pass on July 6th, 1964 to begin topo-500,000 hectares. It is hoped that graphical surveys and installation

> He said that the demarcation of the boundary-line is continuing in an atmosphere of friendship and cordiality.

Mr. Ghazi stated that if fair weather prevailed the job of demarcating the boundry line would be finished within a month and R. A. Butler, British Foreign gation would then return home. yesterday.

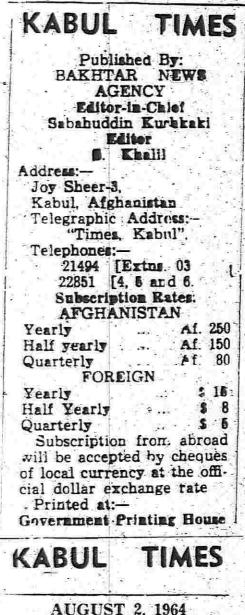

Both sides have explained their views on questions of European security, including questions connected with a German peace settlement.

There was an exchange of views on the Laotian question. The sides exchanged views, in general, on the state of British-Soviet relations and discussed steps for the achievement of further progress.

The USSR and Britain have agreed that "talks, which were held in a spirit of co-operation and cordially offered a valuable opportunity to discuss questions of mutual interest and that it would be useful to maintain contacts whenever there is a chance for this."

KABUL TIMES

Returning AFS students are in a jovial mood as they arrive home after a year in the United States. They are, (front row, left to right): Mr. Mohammad Gul, M. Nadir Atash. M. Zahir Rosta, and Hafizullah Wardak. In back row are: Inayetullah Abawai, Said Mehdi, and M. Wali Haider. Not pictured: Aziz-ur-Rahman Rahmatullah Ghousi, and Abdul Wakil. Another 21 students leave Monday to continue the programme. BY OUR STAFF WRITER

A young Afghan with a wide grin on his face walked up to U.S. Ambassador John Steeves on Friday afternoon, stuck out his hand and said "Hi I'm from Massachusetts." He then launched into a knowledgeable discussion about American politics.

The youth was one of ten Afghan high school students who have just returned to Kabul after spending a year in the United States under the American Field Service (AFS) programme.

Each student lived with an American family and was treated just like one of the other children. They felt so much at home in their new surroundings that many of them referred to their foster parents as "Mother" and "Father.'

"One of my brothers is studying to be an engineer," said one of the Afghans proudly and it took a moment for the Kabul Times reporter to realise he was talking about his "brother" in the

Although the AFS has been operating full time for about ten years, this was the first Afghan group to take part. It worked out so well that another 21 Afghans are leaving Monday to participate in the AFS programme.

The two groups got together Thursday afternoon at the U.S. Cultural Centre Auditorium for an orientation session to allow the new grantees to meet their predecessors and ask a few questions about life in America.

Afghan - Soviet Cultural Relations **Developing Rapidly**

AUGUST 2, 1964

BY PAVEL LUKNITSKY In recent years the Soviet Union and Afghanistan have been actively exchanging delegations of scientists, writers, composers, artists and actors. The Afghans meet Soviet people with a great hospitality and we, in turn, reeive with most sincere friendly feelings our dear Afghan guests. The Kabul newspapers and magazines ever more often carry the portraits of Soviet writers and interviews with them, their sketches, poems and short stories Our publishing houses have started publishing collections of poems by Afghin poets.

The traditions of Russian Soviet literature, which has always taken an interest in Afghanistan suffice it to mention the talented works by L. Reisner, L. Nikulin, O. Erberg, and N. Tikhonov-are successfully developing in the literatures of the Central Asian Re-

One of the ripe fruits of this development is the collection "Afghan Meetings" by a Turkmen poet Anna Kovsova. The poems are devoted to the Afghan's struggle for freedom and their unquenchable striving for progress, and prosperity, their ways of life, customs and spirit

ual world. One of the best poems in the book is "The Obelisk of Freedom' splendidly expressing the author's admiration of the proud Afghan people who upheld their independence in the struggle against the imperialists.

Very expressive is the poem "The Afghan Flag." The poet has found vivid images to explain the symbolic meaning of the three colours of the flag of Afghanistan-the red, symbolising the blood spilt by the people when fighting for freedom; the black, the sign of mourning for the loss of life in the fighting; try's progress.

The good, truly poetic collection of the Turkmen poet is all permeated with sincere love of the Afghan people. For the poet, Afghanistan is in no way an exotic country-its history, nature. culture and songs are near and dear to the Soviet poet-internationalist. (APN)

(Contd. from page 2) other government premises, or the stationings of units therein, is not included in the "freedom of movement." It stated that "for such entry the consent of the government is a prerequisite." DIFFERENT INTERPRETATION

That the Secretary-General-the other signatory of the status of forces agreement-has a different interpretation is indicated by his statement that the holding up and searching of UN vehicles and convoys at roadblocks is "in contravention of the Status agreement'

The status agreement was conluded March 31 through an exchange of letters between the Secretary-General and the Foreign Minister of Cyprus. Paragraph 32 of the agreement reads, in full as follows:

FREEDOM OF MOVEMENT "The force and its members to-

gether with its service vehicles. vessels, aircraft and equipment shall enjoy freedom of movement They were met at the airport throughout Cyprus. Ranger's Success Hailed By Johnson As Victory For International Cooperation WASHINGTON, August, 2, (Reuter).-

PRESIDENT Johnson Saturday hailed America's successful moon photography mission as a "victory for peaceful, civilian international co-operation."

Speaking to scientists who learly next year. directed the Ranger-7 moon shot which brought back more than-. Det pictures of the planet's surface, the President thanked other nations, which participated with the United States in its

space programmes. Dicatory in Pasadena, and Dr. Homer Newell, Assistant Administrator for space sicence.

He asked whether they thought the depression which followed the launching of the Soviet sputniks should be replaced by optimism. Dr. Newell replied "this country ones not seed to hand its head by offy means.

The President asked if they felt 'n was desirable to get 'men on ne moon as soon as possible Both scientists replied that it might be as much as 1,000 feet was necessivy for the mainten- deep-is probably only a foot or ance of U.S. Raddrship in Wes- so deep. orth forld

The President esked if they the first the United States could be first in the world and second. r made "I don't think so." Dr. Prohering said Space was the next demain in which world leadership nut the exercised

De Nevell said that in the area Visionsphed there were ample cas for landing a man-on-theme in this som

Floting to what he termed the clars little traters' shown ene picture Dr. Newell said we existence indicated there it is not a deep layer of dust onhe mouns surface.

There was lear of the existence by the as tinck as 1,000 feet by - side scientists, prior to the miswerell said.

The Device povernment newsearer revestra congratulated Amconta on hor moonduor success, but in the must diective way of sancying . un mounts . sufface . dans be to pat artificial satelale and that for the ininportand communication to the study of and especial-the sea . clouus where Ranger crashed yes suitable for a future "solt" name ng .oy a manned space vehisald 🕹 🐇 ...ut much remained to be done 1961

Scientists quick first study of the pictures indicated that the sea of clouds-dusty dry, like all the moon's so-called seas-would be a suitable area for the landing of men.

Inat was one big reason for He was shown some of the moon Ranger's mission. Earthbound telescope would not show close details of the moon's- surface. Most pictures showed a flat there with craters of .varying sizes.

The photos indicated that some seem to have been made when big chunks of rock landed in the moon's dusty surface, possibly fragments of giant meteorites which carved their own bigger craters farther away.

The fact that the smaller chunks showed in the craters they made indicated that lunar dust which some have speculated

Rangers 8 and 9 will have the sanie goals as Ranger-7-taking close-up photographs of the moon in the final minutes before impact. Their target areas have not yet been selected, but the exceljent quality of the photographs just obtained indicates other possible sites for manned moon landing later in this decade will be investigated.

SUBANDRIO TO VISIT HAGUE NEXT YEAR

DJAKARTA, Aug. 2. (Reuter).-Dr. Joseph Luns, Dutch Foreign Minister, said here Saturday Dr. Subandrio, his Indonesian counterpart, would visit the Hague next year to review the development of relations between the two coun-Tries.

The two ministers completed a week of discussions here yesterday and said in a joint communique that technical talks between Holland and Indonesia would continue in the Hauge next September: The communique made little reference to the controversial question of compensation for Dutch businesses confiscated in Indones-12. . 85

The function was attended by General Khan Mohammad, the Minister of National Defence, some other cabinet members, high ranking civil and military officials and some members of the diplomatic corps in Kabul.

Picture shows General Khan Mohammad greeted by colonel Pan Kan.

Chinese General Warns About Grave Condemns Recent S.E. Asia Situation

PEKING, Aug. 2. (Reuter).-China's military chief senior General Lo Jui-Chang, warned in a speeh here Saturday that the situation in South-east. Asia was "at an exceedingly critical juncture."

General Lo. Chinese Vice-Premier and Chief of the General Staff of the People's Liberation Army, was speaking at a reception to celebrate the 37th anniversary of the founding of the Treaty Organisation at its discrearmy. ...

He said, according to the New China News Agency, that China; Vietnam and Laos were "neighbours as closely related as lips and teeth." He praised "patriotic armed struggle waged by the people in South Vietnam against US imperlialism" and the struggie of the Laotian people to safeguard peace and neutrality and to "oppose violation of the Geneva agreements by US imperialism and its lackeys." The Chinese people, he added. would not stand idle by while US imperialism extended its "aggressive war against Vietnam and other parts of Indonesia." Speaking of "the iron fist" of the Chinese people, he said the "laws of US imperialism" stretching into Southeast Asia would be "chopped off" if the war were further exteded.

Soviet Marshal **US-NATO** Pact

MOSCOW, Aug. 2, (Reuter).-The Supreme Commander of the Warsaw Treaty Organisation forces, Marshal of the Soviet Union A.A. Grechko, has condemned the recent U.S.-NATO nuclear agreement as "a step in a dangerous direction," the Soviet news agency Tass reports.

Under the agreement the United States planned to hand over to members of the North Atlantic tion "the information necessary for the implementation of joint plans of waging nuclear war, he told the newspaper Krasnaya Zvezd in an interview.

Advices To Britain

BALFOUR, Transvaal, Aug. 2 (Reuter).-Dr. Hendrik Verwoerd, South African Prime Minister, said here last night Britain should stop allowing non-whites by their thousands into its midst if it wanted to remain proud of its nationhood.

Dr. Verwoerd, who was addressing a political meeting in this town, 50 miles southeast of Johannesburg, said Britain had appealed in public to the government of the republic, as a so-called friendly gesture, to lessen the sentences passed at the Rivonia trial.

At this trial Nelson Mandela and seven others were convicted of sabotage and plotting violent revolution and were sentenced to life imprisonment.

Dr. Verwoerd said that seeing Britain was such a great friend of South Africa he also wanted to do his duty as a friend of Britain by giving it some sound advice on two points.

The first point was that they should be careful about the immigration of non-whites into Britain.

He said Britain was a proud nation who had rendered great services to the world, but if Britain wanted to remain proud of its own nationhood, it should stop allowing non-whites by their thousands into their midst.

By doing that they were making a bastard race of themselves. They might not realise that now as we do in South Afrira, but I can assure them that it will one day be the source of many difficulties for the British people. Dr. Verwoerd said.

AP report says scientists took second task Saturday at the manger-i photos of the moonthen hope may unlock centuries-... lunar secrets

But one big question seems not settled; the luture of the scienusts and engineers much critiused in the past for six consecutive failures in the 200 million

dollar Ranger pilogramme. Atter Ranger-6 hit the moon but tailed to return pictures last Feb-nuary, James E. Webb, Adminisvalor of the National Aeronautics and Space Administration, said there were definite faults in the design of Rangers and in their ist procedures prior to launch: He ordered a thorough investigation Laboratory operations were overhauled, executives called on the carpet and department heads shifted

There were reports that the newly appointed deputy director retired air force Maj. Gen. Alvin R Luedecke-would order even more drastic changes if Ranger-7 failed

After its success became known, Laboratory Director William H. Pickering seemed jubilantly conident when he promised that two more Rangers would be fired

The communique said the two countries had agreed to raise their d plomatic representation to ambasador level. Holland was prepared to send. xperts to Indonesia, receive rainces and finance bilateral projects, while Indonesia would send guest professors to Holland and receive Dutch scholars for specialised studies.

The two sides had agreed to discontinue as soon as possible discrimination in their financial and economic relations, which would open up the possibility of further economic cooperation.

Home News In Brief

KABUL, Aug 2.-The annual summer ball was held at the British Embassy last night The function was attended by some Cabinet members, high ranking officials Diplomatic Corps and some other friends of British Embassy in Kabul.

KABUL, Aug. 2.- The Bulgarian Parliamentary Delegation visited Salang yesterday morning. They returned to Kabul the same afternoon. 😁

Chinese Diplomat Leaves U.S. Embassy Voluntarily After Asking Asylum .

WASHINGTON; Aug. 2, (Reute).-The State Department said Saturday that the Chinese diplomat, Tung Chi-ping, who was granted temporary asylum in the US embassy in Burundi, had left the embassy voluntarily.

Tung. Assistant Cultural Attache at the Chinese embassy in Bujumbura, the Burundi capital, disappeared from the US embassy there last Wednesday:

The State Department spokesman said Saturday that the 24year-old diplomat had voluntarily sought assistance in obtaining asylum and this was given by the US to protect him.

The spokesman added: "He has now left the embassy by his own choice

Article six of the agreement provided for the U.S. goverment to "transmit also any other atomic information to other countries at its own discretion," he said. So the Americans, whether they wanted to or not, were going tohelp certain countries build their own national nuclear weapons. "Facts show," the Marshal added, "that the U.S. and the other NATO powers are making one concession after another to the importunities of the West German militarists.

The joint armed forces of the countries of the Warsaw Treaty Organisation are capable of carryig any encroachment on the peaceful life of the peoples. We possess the most modern and perfect weapons," he said. "The joint command of the

countries is taking and will take all the necessary measures to ensure the security and to maintain high combat readiness of the allied troops."

His second advice was not to allow the Commonwealth become a tool of Afro-Asia members.

KABUL, Aug. 2.-Mr. Herman. Strauss, Chief of CARE-Medico in Afghanistan held a reception at Kabul Hotel last night honouring Dr. Earl-N. Hillstrom the visiting world wide Director of CARE-Medico. The function was attended by some Cabinet menibers, high ranking officials of some ministries, the US Ambassador at the Court of Kabul and members of CARE-Medico team in Kabul.
