A "Link" Piece: Connecting Theory With Practice

Service-Learning and Evaluation

A Brief Review of Resources and Readings

By
Madeleine S. Hengel, Ph.D. Candidate
Robert D. Shumer, Ph.D.

© May 1997

The National Service-Learning Cooperative is a collaborative project between the National Youth Leadership Council, the University of Minnesota and thirteen other organizations and institutions, funded by the Corporation for National Service under Cooperative Agreement No. CA-001.
Service-Learning and Evaluation

A Brief Review of Issues and the Literature

A "Link" Piece: Connecting Theory With Practice

One of the most frequently requested topics for information at the National Service-Learning Cooperative Clearinghouse is evaluation. Practitioners want to know what to do and how to do it. Graduate students want to know what has been done and how they can do evaluation. Program administrators want to know how evaluation can assist them in making the case for and expanding service programs.

The good news is there is more than enough information available to answer all these requests. There are literally volumes of work on almost every conceivable aspect of evaluation. The bad news: There is too much information available for anybody to make much sense of it in just a few pages. There are entire doctoral programs on the study of evaluation, so it is unrealistic for anyone to believe that a person can become really knowledgeable about evaluation through a workshop or a single source of information.

The purpose of this document is to attempt to provide some guidance to those who are exploring the connections between service-learning and evaluation. Common sources for obtaining the listings appears at the end of the document.

We will define the categories by highlighting the questions that come from the field to frame the topic. Here goes!

Question 1: What do I need to know about the important issues involved in evaluating my service-learning program?

Question 2: Do you have a model of evaluation I can look at?

Question 3: Do you have an instrument I can use?

Question 4: If you can't send me the answer (an instrument or completed design), where can I go for help?

Question 5: Are there studies that "prove" (usually quantitative studies) service-learning is effective?

Question 6: What programs are out there for evaluation?

Question 7: Who has done evaluation/assessment of service-learning and how can I contact them?
Question 1: What do I need to know about the important issues involved in evaluating my service-learning program?

Why Should Assessment Be based on a Vision of Learning?
M. Kulieke, J. Bakker, C. Collins, T. Fennimore, C. Fine, J. Herman, B.F. Jones, L. Raack, M.B. Tinzmann
A web document which may be printed from http://www.ncrel.org/sdrs/areas/rpl_esys/assess.htm (part of Pathways home page on Alternative Assessment).
Describes the four Guidebooks, focusing on assessment for New Learning. Describes the major changes in testing and assessment, gives school-based examples, defines multiple abilities and skills, how to implement multidimensional assessment.

Evaluating a New Service-Learning Program
The chapter summarizes a recommendation to the faculty of a small liberal arts college regarding it's service-learning program. Deals with the design, the faculty, student responses, community sites used.

Impacts and Effects of Service Topic Bibliography
Robin Vue-Benson & Robert Shumer
National Service Learning Clearinghouse, 1995
Lists research and reports which address the impact of service as an instructional strategy. A total of 57 citations are organized as follows: Section1) Social and Psychological Outcomes; 2) Intellectual, Academic Achievement and School Behavior Outcomes; 3) Social/Psychological and Intellectual/Academic Outcomes; 4) Literature Reviews; and 5) Examples of Service Program Evaluation. Citations are annotated and include information about where to obtain the resource.

The Changing Face of Testing and Assessment: Problems and Solutions
Donald L. Hymes and others, 1991
ED 339 726 (ERIC)
A 106-page report which reviews the current state of testing and summarizes the issues and concerns surrounding their usage. The search for alternatives and the ways these alternative assessments are being used is also discussed. The report includes a summary of a survey involving 239 national school leaders. $14.95 plus $3.50 for postage and handling; discounts for multiple copies.
American Association of School Administrators

Performance Assessment: What's Out There and How Useful Is It Really?
Northwest Regional Educational Laboratory, 1991
A 65-page research paper presented at the annual meeting of the American Educational Research Association offers observations about the state and usefulness of alternative assessments, particularly performance-based ones. It includes annotated bibliographies of 117 articles about mathematics, reading, and portfolio assessments and reference charts. $9.90 plus postage.

Question 2: Do you have a model of evaluation I can look at?

Evaluation: the Key to Improving Service-Learning Programs
Marybeth Neal, Minnesota State Department of Education
Robert Shumer, University of Minnesota, Department of Vocational Education
Reviews evaluation as a concept and process. Chapter one defines evaluation, outlines the role of the evaluator, relates evaluation to service learning and discusses resistance to the evaluation process. The second chapter provides evaluation plans, illustrating them with five separate cases. Chapter three provides five evaluation models and the final chapter reviews preparation.

CRESST Performance Assessment Models: Assessing Content Area Explanations
Handbook from the Center for Research on Evaluation, Standards, and Student Testing presents assessment models for secondary-level history and chemistry and specifications for duplicating the technique with other topics and subject matter areas. The processes for training rater, scoring the assessments, and reporting results are described. $10.00 plus $2.50 postage and handling. from UCLA/CRESST

Question 3: Do you have an instrument I can use?

Instruments and Scoring Guide of the Experiential Education Evaluation Project
Dan Conrad, Diane Hedin
Center for Youth Development and Research, General Mills Foundation
Rockefeller Family Fund, Spencer Foundation
As a result of the Experiential Education Evaluation Project, the publication identified instruments used to measure and assess experiential learning programs. The following information is given for each instrument: rationale for its inclusion in the study; precise issues or outcomes designed to measure validity and reliability data; and directions on how to score. Descriptions of assessment tools are organized according to four categories: Instruments on Social Development (Social and Personal Responsibility Scale, Semantic differential on Attitudes toward Others, Semantic Differential on Community Participation, and Career Exploration Scale); Instruments on Psychological Development (Rosenberg Self Esteem Scale and Janis Field Feelings of Inadequacy Scale); Instruments on Intellectual Development (Problem Solving Inventory); and Instruments on Differential Program Impact (Characteristics of a Community Field Experience Checklist, Experiential Educational Questionnaire). The appendix contains the complete Experiential Education Questionnaire, pretest and posttest Availability: ERIC (EDRS) or the National Service Learning Clearinghouse

Alternative Assessment(Identifier)-Assessment in some form other than multiple choice,
standardized tests, e.g. constructed responses, open-ended essays with no single correct answer,
portfolios that are collections of students' work over time, and project work that involves collaboration with peers.

**Authentic Assessment** (Identifier) - Student assessment in which knowledges and skills are measured using the real world environment, rather than standardized tests.

**Informal Assessment** (Descriptor) - Appraisal of an individual or group's status or growth by means other than standardized instruments. (term dates officially to 1977)

**Performance Based Evaluation** - No official working definition in ERIC; however, this one is from the Office of Technology Assessment of the US Congress (1992): Performance Assessment is testing that requires a student to create an answer or a product that demonstrates his or her knowledge or skills.

**Portfolio Assessment** (Descriptor) - Systematic collection of a student's work samples, records of observation, test results, etc., over a period of time for the purpose of evaluating student growth and achievement - used occasionally with populations other than students. (term dates officially from 1994).

**Portfolios** (Background Materials), (Descriptor) - Collections of records, letters of reference, work samples, etc., documenting skills, capabilities, and past experiences. (term dates officially from 1978).

**ERIC Clearinghouse on Assessment and Evaluation:**
http://www.lib.ncsu.edu/disciplines/015-ERIC-EducationalReso.html

On the Internet, go to the Special resources section to access the Educational Testing Service Test Collection database, the Buros Test Review Locator, etc.

This clearinghouse, 1 of 16 within the US Department of Education's Educational Resources Information Center (ERIC) system, acquires, selects, and abstracts information on educational testing and evaluation, including measurement devices, research design, and methodology. In addition, the Clearinghouse produces information analysis products; disseminates complimentary ERIC products, such as digests, newsletters, and brochures; and provides free reference and referral services and search strategy consultation.

Question 6: What service-learning evaluation programs are out there?

*Evaluation of Two Alternative Programs for Junior High School Students*
Janet Malvin
Pacific Institute for Research and Evaluation, 1992, 24 pages
Based on the alternatives approach to drug abuse prevention, two service opportunity courses were offered to 8th and 9th grade students. Students in Cross-Age Tutoring were taught tutoring and communication skills and spent one period, 4 days per week tutoring elementary students. Students in School Store (a service opportunity developed for this study) were taught business and interpersonal skills and operated an on-campus store. Students who volunteered for either course were matched and one student from each pair was randomly assigned to receive the course while the other served as a control. All students were pre- and post-tested via a self-reporting Student Questionnaire, observations and interviews, and most students participated in follow-up testing 1 year later. Affective and drug-specific measures were collected with positive effects of the courses hypothesized for self-esteem, attitudes toward school, attendance, locus of control and discipline problems. Results indicated negligible effects for either course, although students rated the course favorably. Discussion of the results in terms of shortcomings of the courses themselves and limitations of the school-based model of alternatives to drug abuse and calls into question the efficacy of incorporating service opportunity prevention strategies within the school curriculum.

Evaluation of the Effects of a Personal Empowerment Program for Adolescents
Carl I. Fertman, Nancy H. Chubb
Monograph. non-academic research report, 1990, 20 pages. The ecological perspective holds that community and school activities are a rare product of interaction among adolescents, communities, families and schools. This study was designed to assess the outcomes of a personal empowerment program. The sample consisted of 25 male and 27 female 9th grade students. They took a pre-test and received a total activities score which represented the degree to which they were involved in organized activities at school and in their communities. Subjects were selected from the middle range of activity participation and then randomly assigned to the experimental or control group. 19 students completed a 1 week summer workshop on personal empowerment with follow-up sessions during the school year. The summer workshop consisted of small and large group activities focused on leadership, communications, assertiveness, stress management and decisionmaking. Student took a post-test 6 months following the week long workshop. Results indicated that the effect of the personal empowerment program was to maintain the experimental groups' level of activity participation while the control group decreased its level of participation. No significant differences were found at post-test for locus of control or self-esteem. The value of the findings in general is that participation in activities, at least by adolescents with moderate activity involvement, can be affected, even through a fairly simple and short intervention.

Joe Follman, James Watkins
Southeastern Regional Vision for Education, Office of Educational Research and Improvement. Monograph. classroom guide for the instructor, 1994, 108 pages. Defining service-learning as the formal integration of public service into student instruction and learning, this guide provides teachers with ideas for narrowing the gap between what students do in school and what they will do after they leave school. The example activities, derived from actual projects, demonstrate the nearly limitless range of possibilities for service-learning. The guide is divided into four sections. The first section provides examples of interdisciplinary projects, by grade level: Intergenerational projects, tutoring and mentoring projects, environmental and recycling projects, school improvement projects, and others. The second section offers single-discipline projects, by
The third section offers practical information on the steps involved in establishing service-learning programs. The fourth section contains descriptions of useful publication on service-learning and annotated lists of organizations at the local, state, regional, and national levels that can provide information and resources to people interested in initiating or expanding service learning. Throughout the guide, “Program Profiles” provide fuller descriptions of exemplary service-learning programs in schools and organizations in the southeastern United States and across the country. Appendices contain standards for service-learning, an exercise for identifying nearby service opportunities, a sample interdisciplinary planning form, and other information. Contains a 123-item bibliography.
