Historical Statement

THE University of Omaha is an outcome of the modern educational trend in the direction of establishing institutions of higher liberal, technical and professional training in the great centers of population. The growth of cities is the phenomenon of our modern civilization. In all countries which have progressed beyond the merely agricultural stage of industrial development, the proportion of the total population residing in cities is steadily increasing at an astounding rate.

PROBLEMS ENTAILED BY PHENOMENAL GROWTH OF CITIES

This persistent and rapid concentration of populations entails grave economic, civic and social problems of the most crucial sort. Indeed, the problem of the city may be said to be the outstanding problem of our modern social organization. America's greatest menace lies in her failure to adequately reckon with her municipal problems. For this great task there must be trained efficiency and this can be best provided only through appropriate agencies conducted in closest proximity to the problems which require to be scientifically studied and treated. It is the recognition of this fact that has led to locating nowadays in cities various philanthropic institutions which formerly were thought to be rightly located only beyond the city limits.

MODERN CITIES AS EDUCATIONAL CENTERS

It is only a further recognition of this same fact that has led to the establishment of city universities and colleges, conceived on broad lines, permeated with civic pride and devotion to human welfare, and articulating themselves with the varied needs of cities for scientific guidance and trained efficiency. Indeed, philanthropic and remedial agencies, in general, serve their purposes better when operated in correlation with the systematic processes of investigation which obtain in a university.

Similarly, the industrial enterprises of a city may, with advantage, become quite extensively articulated with the scientific department of a well-equipped university. Every great city may be likened to a ready-made laboratory where the materials and processes of production and distribution are assembled on a vast scale and lend themselves most readily and normally to scientific study and manipulation. Here, as nowhere else, should theory and practice meet. Here is where science and its application should be most skillfully exemplified.

AN EXPLODED NOTION

Once the opinion prevailed that a university is an institution for the cultivation merely of speculative, theoretical and aesthetic tastes, a so-called "republic of learning," or agency for engendering an intellectual aristocracy, and that it should be properly located "under classic shades" and in romantic surroundings remote from the work-a-day world. But our modern world with its spirit of mastery, its highly organized industry, its political and social purposiveness, its demand for scientific specialism, technical skill,
and trained efficiency, will no longer brook such a divorce of higher education from practical affairs. The times demand that educational ideals and aims be democratic, humanitarian and practical. More than ever Wisdom, like the tabernacle of old, must take up its abode in the midst of the people. All the advantages of higher liberal, technical and professional education must be made accessible to the masses of young humanity and, indeed, to all educable persons of whatever age, who live within our throbbing centers of population. They must be brought within at least a street car fare of every person craving and ready to use these advantages.

A BIT OF HISTORY

Actuated by such considerations as the foregoing and by a sincere civic pride and devotion, a group of representative citizens organized themselves, in the early summer of 1908, into a Board of Trustees and began the active promotion of the movement for the founding of a non-sectarian, co-educational institution of higher liberal, professional and technical learning under such auspices as would conduce to the highest type of intelligent and efficient citizenship. This Board incorporated as the University of Omaha on October 8, 1908, and inaugurated its educational work on September 14, 1909, with an enrollment of 26 students.

The success of the enterprise has abundantly vindicated the hopes and aims of its promotors, as the following statistics concerning attendance prove:

The University has steadily, year by year, extended the range of its educational work and is providing the advantages of higher liberal and practical education for hundreds of ambitious, intelligent, and worthy young Omaha people who otherwise would have been compelled to go from home to secure these advantages.

WHAT THE UNIVERSITY HAS DONE FOR OMAHA

It has attracted a continually increasing number of non-resident students. It has done much toward making Omaha a recognized educational center. It has made Omaha a more desirable place of residence by multiplying those influences which minister to idealism and culture. It has, during its brief nine years of existence, expended in Omaha approximately $1,400,000.00 for buildings, equipment, supplies and salaries. In addition it has saved and brought to Omaha, in the way of student expenses, an average sum of more than $100,000.00 annually. Its expenses have increased from year to year with the growth of the student body and extending range of its educational work. It is conservatively estimated that, since it was founded, the institution has either brought to or saved to Omaha a sum of, at least, $1,600,000.00.
General Information

LOCATION

The University of Omaha is located in a very attractive residential part of North Omaha, closely adjoining Kountze Place, and also quite near to Kountze Park. It is easily accessible from all parts of the city and its environs by way of the North Twenty-fourth Street Car line, which is the principal thoroughfare of the city.

GOVERNMENT

No elaborate system of rules is imposed upon the students for the regulation of their conduct. Each student is expected to prove himself or herself capable, in large measure, of self-government in accordance with the highest accepted principles of rectitude and propriety. Honorable character, devotion to learning, loyalty to the University, regard for its standards of character and scholarship, and unstinted courtesy toward the faculty and fellow-students are absolutely required. Students who are found to be out of sympathy with these broad essentials of self-government will be requested to withdraw from the University even though there be no specific breach of conduct.

Regular and punctual attendance at recitations and lectures is required. It is also expected that students will be faithful in attending the daily Convocation. Any lack of cordial acquiescence with the requirements and recommendations of the faculty will be regarded as sufficient ground for discipline.

MORAL AND RELIGIOUS INFLUENCE

No religious tests are prescribed either for entrance into the University, for participation in any of its privileges, or for graduation and title to any degrees conferred by it.

Nevertheless, the educational system of the University is being built on the assumption that a moral and religious atmosphere is not only conducive to the completest culture, but that it is necessary to the development of the highest type of manhood and womanhood. While, therefore, religious freedom is guaranteed to all, thorough instruction is imparted in the history, the literature, the ethics, and the religious conceptions of the Bible. In addition, a religious character is maintained in the daily Convocation. The students are also encouraged to maintain an active interest in their own religious welfare by identifying themselves with the churches of the city and with the Y. M. and Y. W. Christian Associations of the University.

CONVOCATION

Convocation exercises are conducted daily in the chapel. These exercises are opened with a reading from the Scripture and prayer. Various matters of interest to the life of the students are discussed. Addresses are frequently made by members of the faculty and invited speakers from the city and abroad. Students are expected to habitually attend these exercises.

RELIGIOUS ORGANIZATIONS

There are two distinctively religious organizations of students, namely, the Young Men's Christian Association, and the Young Women's Christian Association. Both are well organized for the
purposes of voluntary study of the Bible, of Missions, and of practical religious problems. These organizations also aim to promote the highest type of social life among the students and, particularly, to aid new students in every possible way during the early days of each new school year. On Friday evening of the opening week the two Associations hold a joint reception in order to further acquaintance and good-fellowship among the students.

MEN'S DEBATING CLUB

This club, to which all male students of the University are eligible, aims to promote oratory, debate, and a general forensic interest. Public contests are held among the members and with other institutions of learning. From its membership are chosen representatives for the Inter-Collegiate debates.

UTOPIAN LITERARY SOCIETY

Membership in the Utopian Literary Society is open only to the young ladies of the University. As its name suggests, it is organized for the purpose of realizing the worthiest standards of social and literary life among college women. It affords most valuable opportunity for attaining excellence in literary production, extemporary speaking, and in conducting deliberative assemblies.

DRAMATIC CLUB

This club has been organized for the purpose of furthering interest among the students in amateur dramatics. Entertainments are given from time to time by members of the club. The special aim is to develop dramatic appreciation and power of expression.

ATHLETIC ASSOCIATION

This organization represents in a wide way, the athletic spirit and enterprise of the student body. It promotes and, in co-operation with the faculty, regulates all games and contests between students and with teams of other institutions. Great credit is due the Association for the commendable results it has attained in developing wholesome and manly sports.

STUDENT PUBLICATIONS

There are three student publications: The Yellow Sheet, the Gateway, and the Annual. All three are under the editorial management of the Gateway Staff. In the Spring the student body elects four upper classmen who are to serve as editor-in-chief, assistant editor, business manager, and assistant business manager for these three publications during the following school year. All other positions on these publications are filled by students appointed by the editor-in-chief and the business manager. The persons thus elected and appointed constitute the Gateway Staff.

The Yellow Sheet is a daily one-page paper. Its first issue appeared on November 9, 1911, in the form of a promulgation to boost football. It has been issued continuously on school days since and derives its name from the color of the paper on which it is printed. All students are invited, by the editors, to contribute to its news and literary output.

The Gateway, which is published monthly, is the usual type of College magazine. It is intended for a wide circle of readers, including the Alumni and the friendly public. It aims to be a re-
liable medium of college news as well as an organ of expression for the serious, humorous and sentimental sides of college life.

The Annual is the June number of the Gateway. It is highly artistic in appearance and is intended very especially to perpetuate the memory of the personal traits and achievements of the members of the graduating class. It contains a brief account of each class and recognized organizations of the school. Thus it serves as a general souvenir of the year's events.

COLLEGE ORGANIZATIONS

Student Council

The Student Council is composed of two members from each college class, one selected by the class and one by the Faculty. A faculty representative is appointed by the President of the University. The Council holds regular meetings for the discussion of problems of interest to the students, and is free to make recommendations to the Faculty on matters of student life and activity. As a medium through which student sentiment finds expression, the Council does much to promote a healthy college spirit.

Gateway Club

The Gateway Club is composed of all students of the College Department. This club has charge of the election of officers for all organizations representing the general student body, such as: The Student Council, The Gateway Staff, and the Central Committee in charge of Gala Day Exercises. All elections are subject to the condition that persons elected must be in good standing and approved by the Faculty.

Student Volunteer Band

The object of the Student Volunteer Band is to bring together for mutual stimulation and study of Christian Missions young men and women who have volunteered for service as Christian missionaries in non-Christian lands.

Alumni Association

The Alumni Association is composed of all graduates and former students of the University. Its object is to advance the interests of the Institution, to revive and renew the associations of college days, to promote class reunions at commencement seasons and to keep a complete list of the names, addresses and after-college employments of all matriculates.

CLASSIFICATION AND STANDARDS

Students should confer with the Classification Committee of the faculty at the beginning of each semester in arranging their schedule of studies. It is the duty of this committee to estimate all certificates of credit presented for admission and to advise students in regard to their schedules of study. Failure to consult the committee is liable to cause difficulty and delay in effecting final registration.

ATTENDANCE AND PUNCTUALITY

Students are required to attend regularly and punctually all lectures, recitations and laboratory courses of classes in which they have been registered.
GRADES AND CREDITS

The final semester reports are made in accordance with the following system of marking: E, excellent; G, good; F, fair; Fd, failed; Con, conditioned; Inc, incomplete; X, absent from examination. Passing mark is 70 at all times. These reports are not given out to the students by the instructors, but are regularly issued from the office of the Registrar.

If a student is reported failed in any subject, he or she can not receive credit for that course until it has been pursued a second time in the regular way.

A student may be reported incomplete, if some minor portion of the work remains unfinished, providing the student's standing in the course has not been below F.

RULES REGARDING TARDINESS AND ABSENCE

Three tardy marks count as an absence.
No cuts are granted.
Excuses for absences must be presented within the limit of one week.
A deduction of two per cent will be made from the semester grade for all unexcused absences.
Work must be made up for all absences, excused or unexcused.
Preparatory students must bring written excuses from parents.
In case of an extreme number of absences, the teacher's discretion shall determine what, if any credit is to be given for the course.
Presentation of excuses and application for permission to make up work rests with the student.

DISCIPLINE

Offences against good order in the class rooms are generally dealt with by the individual instructors. Flagrant cases are reported to the Discipline Committee.
Wilful disregard of summons from the Discipline Committee or the Dean or the Student Council, shall render the offender liable to suspension.
Students are suspended or dismissed whenever, in the opinion of the Faculty, they are pursuing a course of conduct detrimental to themselves or the University.

DELIQUENCIES

Warning.—A student whose work is unsatisfactory is warned. In such cases notice is sent to the student, and if practicable, to his parents or guardian.
Probation.—A student whose work is extremely unsatisfactory is put on probation. This means that he is in danger of dismissal from the class or from the University. During the period of probation the student is on trial to prove his fitness to continue the work.

DEGREES

Two baccalaureate degrees are conferred by the College of Liberal Arts and Sciences, namely, the degree of Bachelor of Arts and of Bachelor of Science. The former degree is conferred on all
graduates of the College of Liberal Arts and Science who, having satisfied all other requirements of the curriculum for graduation, have sufficiently specialized in languages and literature. The latter degree is similarly bestowed upon those who, having satisfied all other requirements of the curriculum for graduation, have sufficiently specialized in the sciences.

The degrees of Master of Arts and Master of Science respectively, will be conferred upon candidates holding the corresponding baccalaureate degrees upon completion of a year of approved postgraduate study at the University.

The degree of Bachelor of Laws is conferred on those who complete satisfactorily the prescribed courses of studies in the School of Law and pass the State Bar Examination.

INTERIOR OF GYMNASIUM
Curriculum of the College of Liberal Arts and Sciences

The academic year is divided into two semesters of eighteen weeks duration each. A summer session of eight weeks duration has been added for the accommodation of teachers, prospective teachers, and others who desire to pursue special courses of concentrated study. The academic requirements for graduation are measured in units termed "credits." Those who have satisfied the entrance requirements will receive such "credits" for all courses successfully completed during either the regular or the special summer session. A total of one hundred and twenty-eight (128) credits is required for graduation and title to a degree. The courses from which these credits are to be earned are distributed into the following classes:

I. Fixed Requirements.
II. Required Electives.
III. Free Electives.

I. The Fixed Requirements include the following courses:

<table>

* A credit equals 1 semester hour or 18 hours of recitation or its equivalent in laboratory work.

† Presupposes two years of preparatory Ancient Language.
III. FREE ELECTIVES:

(a) The remaining credits of the required 128 for graduation must be made from the following groups of studies. This group system is intended to give a list of related subjects from which major and minor subjects may be chosen:

Group 1. Ancient Languages (Latin, Greek).
Group 3. English Language and Literature and Public Speaking.
Group 4. Psychology and Education.
Group 5. Philosophy, Logic and Ethics.
Group 6. History, Economics, Political Science and Sociology.
Group 8. Physical and Chemical Sciences.
Group 9. Biological Sciences and Geology.
Group 11. Sacred History and Literature.

(b) Every student is advised (particularly in looking forward to post-graduate work), before the opening of the Junior year, to select a major subject, and one or two collateral minor subjects, the latter to be chosen under the advice of the professor in charge of the major subjects.

(c) What groupings of individual courses may constitute a given major or minor is to be determined by the professor in charge of the major subject.

(d) Regulations are designed, not only to limit specialization, but also to throw what specialization is permitted late in the course, in order that as much general education as possible may be secured before specialization begins.

## FOUNDATIONAL COURSES

1. **Law**—While acquiring a liberal education, the student may by judicious selection of courses in history, economics, political and social sciences, etc., advance his preparation materially for the study of law. He may also pursue legal studies with an attorney-at-law in the city and thus shorten his preparation for admission to the bar.

2. **Theology**—The attention of students who expect to enter the ministry is called to the courses in Bible study, moral philosophy, psychology and sociology as particularly serviceable. At the same time he will, of course, be gaining the broad, liberal foundation necessary to satisfactory work in the seminary.

3. **Medicine**—Students expecting to enter the medical profession will find the courses in chemistry, physics and biology outlined to suit their needs. The Nebraska entrance requirements to the medical college consists of at least two years of college preparation. The detailed requirements are stated elsewhere.

4. **Teaching**—The courses offered in the departments of psychology and education are of interest and cultural value to all students. They are of special interest to prospective teachers. Graduates who meet the requirements for state certification are entitled to a first grade state certificate. A feature of special interest in these departments is the bringing of well known specialists in the various fields of psychology and education to the University of Omaha summer school session of eight weeks. This affords unusual opportunities to prospective teachers as well as to teachers of the city.

5. **Engineering**—The student desiring to prepare for the study of engineering will find courses in mathematics, physics, mechanical drawing, chemistry, etc., that provide a large part of the theoretical training.
TERMS OF ADMISSION TO COLLEGE OF ARTS AND SCIENCES

All candidates for admission to the University, in any of its departments, must afford satisfactory evidence of good character and, if they come from other institutions of higher learning, they must afford evidence of favorable dismissal.

There are two methods of admission to regular standing in the Freshmen class of the College of Liberal Arts and Sciences, namely, by certificate from accredited preparatory schools or by passing an entrance examination. In either case a total number of thirty credits* in preparatory studies must be presented and they must conform to the following distribution into Requisites and Electives:

1. Requisites:

* A study successfully pursued in five recitations of forty-five minutes duration each week for one semester (18 weeks) constitutes a credit.

† Greek and Roman History preferred.

‡ Not less than a year's work in either Physics or Chemistry will be accepted.
ARREARAGE OF CREDITS

Candidates who have satisfied the above exhibited entrance requirements with an arrearage of not more than 6 credits may be conditionally classified as Freshmen. This concession will be made only with the understanding that the arrearage will be removed by the end of the Freshman year.

ADMISSION OF ADVANCED STUDENTS

A student coming from another University or College of recognized high standing may, upon presentation of a certificate of honorable dismissal, be admitted to the University of Omaha ad cundem gradum and be regularly graduated providing he pursue at least one full year of a regular course in the University. Every such applicant for admission is required to present, along with a catalogue of the institution in which he has studied, a detailed statement, adequately certified, of all the studies he has completed, including the preparatory studies for which he has credit.

ADMISSION OF SPECIAL STUDENTS

Candidates for admission as special students, not looking forward to regular graduation with a degree, must give satisfactory evidence to the Faculty that they have sufficient attainment in scholarship to advantageously pursue the courses which they seek to enter. Such students are otherwise subject to the same regulations as determine the admission of regular students and will, upon request, be granted certificates of work done. Providing they have met the requirements for regular entrance into the Freshman class, they will be given full college credits for all studies completed and these credits may, upon later request, be applied to satisfy the requirements for a degree.

ENTRANCE EXAMINATIONS

Prospective students desiring to present themselves for the entrance examination, in accordance with the above described requirements, should do so on the Thursday in September preceding the opening day of the first semester of the college year.

MATRICULATION AND REGISTRATION

The opening day of the first semester is entirely devoted, after the Convocation services, to the work of matriculation and registration of students. It is necessary before being matriculated and registered to make settlement with the Treasurer for tuition; also to arrange schedule of studies with the Classification Committee. On applying to the Registrar for matriculation and registration all candidates should present, along with their certificates of credit and other testimonials, the Treasurer's receipt for tuition.

DEPARTMENT OF MUSIC

The purpose of this department is to afford college students the advantage of a musical training in connection with their liberal education. Training is offered in both vocal and instrumental music. Students may register for either one or two private lessons per week in either line of study. For those specializing in music, two lessons per week is advised for the most satisfactory results. Regular college students, not specializing in music, will usually find it more advisable to restrict themselves to one lesson per week.

When accompanied or preceeded by Music 1 and 11, eight hours of Practical Music will be accepted toward the A. B. degree. One half-hour lesson with six or more practice hours per week, per semester, constitutes a credit hour; two lessons with nine practice hours, two credits.

Students who evidence distinct musical ability may, upon satisfactory completion of the work as outlined, receive a Music Certificate. The time required for each course, as indicated in this catalog, is estimated time for talented pupils practicing the proper amount of time to prepare each lesson. Some require a longer time to complete the course.

For those who specialize in music, the theoretical courses are required as being absolutely necessary for artistic interpretation of great works and intelligent appreciation of all good music. These courses, however, are open to all students. The course in History and Appreciation of Music is presented with special regard for those who do not themselves play or sing, but who wish more fully to enjoy the performance of others and more intelligently to judge and appreciate the compositions rendered.

The following is a general outline of the technical work to be covered by students specializing, the studies and exercises being varied to suit the needs of each individual.

COURSES IN PIANO

For those who are not sufficiently advanced to take up the studies as outlined, preparatory work is given, such as: Hanon Finger Exercises; Burgmüller, Op. 100; Kohler, Op. 151 and 157.

COURSES IN VOICE

Those who specialize in singing must have preceded or must accompany their voice lessons with work in the piano department equivalent to the first year outlined for specializing in piano. As the average voice will not permit more practice than an hour a day the first year of training, the student has ample time for, at least, one piano lesson a week.

Maintaining that no singer's repertoire is complete without songs in, at least, one foreign language, before entering the fourth year of voice study the student must have gained (preferably through college study) an accurate pronunciation of one of these three—
Italian, German or French. The language chosen will determine whether the songs studied in the original language shall be Italian arias and ariettas from the concert and operatic works of the eighteenth and nineteenth centuries, or songs selected from such works as set forth in Max Spicker's Anthology of French Song, or whether the last year shall open to the pupil the study of the rich and beautiful songs of Tschaikowsky, Abt, Rubenstein, Brahms, Schumann and Schubert.

In the first year of voice study, special attention is given to clear, correct English diction and enunciation. To develop this and, at the same time, to emphasize musicianly interpretation, simple but good English songs are used. As a free tone with good breath support is acquired, increasing attention is given to voice placement, attacks, flexibility, etc.

The following vocal studies are accompanied by breathing and tone-freeing exercises adapted to the needs of the individual pupil.

The same theory as for specializing in piano is required. Also, students who are making their singing a specialty must serve the first two years as active members of the College Glee Clubs. For this one credit hour per year is given.

MUSIC

Courses in History, Theory, and Application of Music

Music I and II—Harmony. Major and minor scales, intervals, triads, simple part writing, chords of the seventh, modulations and an original hymn.

Music III and IV—Advanced Harmony. Secondary seventh chords and their inversions, altered chords, difficult modulations, suspensions, retardations, the passing tone and embellishment, pedal point, florid figuration, accompaniments, an original song or violin piece, a simple original piano composition.

In order to gain the practical application of theoretical study, all written Harmony is accompanied by harmonization at the piano. For this "Keyboard Training In Harmony," by A. E. Heacox, is used to augment the exercises given in the regular text.

Textbook for the entire Harmony course—"Lessons In Harmony," Heacox-Lehman. Two hours attendance, five to six hours preparation per week, two hours credit per semester.

Music V and VI—Ear Training. Although open to anyone, this course is offered primarily for those taking first-year Harmony. Ear Training consists of practice work, carried on in class, with outside drill for those who find the class work difficult. Studies are taught to recognize by ear and to correctly notate rhythms, intervals, chords and chord progressions.

One hour attendance, one credit for two semesters, no credit for one semester.
Music VII—History and Appreciation of Music. A study of the historic development of music from the most primitive forms to the works of today. As the lives of great composers are taken up, as many of their representative works as possible are heard and discussed as an important part of the class work.

Two hours attendance. One semester. Two hours credit.

Music VIII—Harmonic Analysis. "Harmonic Analysis is the art of accounting for everything in the harmonic and melodic structure of music." With this object, excerpts from music of all periods and styles are analyzed and difficult melodies are harmonized at the piano.

Textbook—"Harmonic Analysis," Lerman.
One semester. Two hours attendance. Two hours credit.

Music IX—Form In Music. A study of motive transposition, followed by analysis of the larger classic forms.

Textbook—"Form In Music," MacPherson.
One semester. Two hours attendance. Two hours credit.

Note—Music I, II, III, IV, VIII and IX must be taken up consecutively.

Teaching of Public School Music—Special courses in Methods of Teaching Public School Music are offered under the instruction of Miss Johanna Anderson, Supervisor of Music in the Omaha Public Schools.

BUSINESS COURSE

Shorthand—Standard Method. One hour, first semester. Two hours, second semester. Three credits.

This course includes the study of business forms and office practices, and is conducted with a view to meeting the needs of students who are preparing for business or professional careers.

Salesmanship.—The principles and practice of salesmanship. One semester. Two hours. Two credits.

Commercial Arithmetic.—Adapted to needs of those entering business. Five hours. One semester. One credit.

Commercial Law.—Study of law in its general application to business procedure. Three hours. One semester. Three credits.

GENERAL STATEMENT

The Law Department of the University of Omaha has been in existence as such five years. It was formerly the Omaha School of Law, a night school, which had been in successful operation for more than twenty years. Since its affiliation with the University of Omaha, however, our Law Department has made rapid strides in growth and development, the enrollment of students having increased five hundred per cent.

Our law department is a night school, and presents the opportunity to obtain a practical and thorough education to men who could not afford to spare the time to attend day classes.

Our instructors are competent, capable practicing lawyers of the Omaha Bar, and are not only well versed in the theory of the law, but being active practitioners, they are able to give the students of their own knowledge through their experience and lead the way easily to a practical understanding of the study, and the application of theory to practice.

The design of this school is to prepare students for the practice of law in any court of all the States of the Union, particular attention being given to the practice and courts of Nebraska.
METHOD OF INSTRUCTION

We have combined the two systems of the study of law, namely: The Text-book System and the Case Book System; that is, a text­book is used for the study of every subject, wherein the subject is treated logically, comprehensively and completely. Then case books are used in conjunction with each text book, which contain the leading and most important cases which have been decided by the highest courts, and which cases furnish a practical application of all important rules of law as contained in the text books.

The system is now recognized by many of the leading Universities throughout the United States as being the most efficient and thorough.

REQUIREMENTS FOR ADMISSION

Applicants for admission must be of good moral character. The faculty realizes that there are many young men who desire to pursue the study of law for commercial reasons and do not care about a degree; and to enable such men to take up the work, no particular educational qualifications are required for admission.

However, those who seek admission to the degree of Bachelor of Laws are required to have a preliminary education equal to a complete four-year high school course and must have thirty-two high school credits. Graduates of recognized universities and colleges, persons presenting diplomas or certificates from accredited high schools, normal schools and academies, and persons holding state or county teachers' certificates, will be admitted without examination. Other applicants for admission to the degree of Bachelor of Laws will be examined and must give satisfactory evidence of possessing the equivalent to such preparation as is afforded by the completion of a high school course.

ADVANCED STANDING

Students presenting proper credits from an approved law school may be admitted to advanced standing without examination. Others possessing the required preliminary education may be admitted to advanced standing upon passing satisfactorily an examination on the studies of the preceding year or years.

SPECIAL STUDENTS

Persons not candidates for a degree will be permitted to pursue special studies under the direction and supervision of the faculty.

REQUIREMENTS FOR GRADUATION

Bachelor of Laws

For admission to the degree of Bachelor of Laws, the following requirements are made of each student:

First—He must have received eighty credits.

Second—He must have passed satisfactorily examinations upon all studies of the undergraduate course.

Third—He must have prepared such legal papers as have been assigned for practice; and in addition, an original thesis upon some legal topic approved by the faculty.

Fourth—He must have prosecuted or defended to judgment such cases in the practice courts as have been assigned to him by the faculty.

Fifth—He must be, at least, twenty-one years of age upon graduation, and must have settled with the treasurer for all fees, dues and expenses.
Master of Laws

For admission to the degree of Master of Laws, the following requirements are made:

First—The candidate must be regularly admitted to the Post-Graduate course.

Second—He must have pursued the study of law in this school for one year after such admission and have completed, to the satisfaction of the faculty, such a course of study as may be required.

COURSE OF INSTRUCTION

The course of study covers four years of thirty-six weeks each. The sessions of the school are held in the evenings, the classes meeting at the Y. M. C. A. and McCague Buildings located downtown. The classes meet from 6:15 to 8:00 o'clock in the evenings.

The regular course of instruction, subject to necessary modifications, will be as follows:

FIRST YEAR

Elementary Law—Lectures and text-book references, embracing history and sources of common law. The design of this course is thoroughly to ground the student in the fundamental elements, to give him a general survey of the science, acquaint him with its leading rules and the connection of each with the principle from which it is derived, and to implant clear conceptions of legal terms. Text-book: Smith's Elementary Law. Twenty-six days at the beginning of the first semester.

Personal Property—Text-book: Schouler. No cases. Two hours. One semester.

Two hours. One semester.

ADVANTAGES

The facilities at the disposal of our law students which are afforded by the city of Omaha are in many respects superior to any to be found in the west. The large business interests of a metropolis afford opportunities for an acquaintance with their management which will be of inestimable value to the lawyer. The Omaha Bar has the reputation of being one of the strongest in the United States, and cases of the greatest importance are constantly being heard before Omaha courts. The following courts are in session during the school year: United States District Court; four Civil Law branches, two Equity branches and one Criminal branch of the State District Court; the County Court of Douglas County; the Municipal Court of the City of Omaha, which has three judges; Justice of the Peace Courts, and two Police Courts. These are all within a short
distance of the law school. Nowhere are facilities more convenient for acquiring familiarity with court practice, federal, state and city, observing the methods, and listening to the legal arguments of able and successful practitioners.

In addition to the above, a few minutes' ride brings the student to the several courts sitting in Council Bluffs, Iowa, where he can familiarize himself with the Iowa Code and Practice, and this will be of great advantage to those students who intend to practice in Iowa.

Our law library now consists of about two thousand volumes, and is constantly being contributed to by friends of the University. Other library facilities in Omaha are extensive and convenient. The City Library, containing about 90,000 volumes, is one of the best selected and most complete libraries in the west. The Douglas County Law Library has a complete line of state reports of all the states of the Union, as well as Law Digests and Statutes of the various states. By the courtesy of the individual members of the Omaha Bar, students may have access to several well equipped private libraries.

FEES AND EXPENSES

The annual tuition is $80.00, payable one-half at the beginning of each year, and the balance within sixty days thereafter. A diploma fee of $10.00 is charged when issued. No deductions will be made for absences or for failure to complete any course.

Students desiring to pursue one or two subjects only, and not candidates for a degree will be required to pay a fee of $15.00 per subject.
