1. The entering year is defined by IPEDS year (summer, fall and spring terms) and represents the first term a student enrolled in a plan.
2. Students that complete a degree within 10 years are counted as successfully completing their programs.
3. These completion rates include only degree/certificate-seeking students. In the event one individual pursues more than one degree/certificate, it considers separately the completion/timeline for each degree/certificate pursued. This graduation rate should not be interpreted simply as an overall cohort rate, as is used for undergraduate student graduation rate.
4. The doctoral students entering since 2018 are still actively working towards their doctorate.
