**PURPOSE OF THE SURVEY**

The primary purpose of this survey is to collect basic data to describe the financial condition of postsecondary education in the nation; to monitor changes in postsecondary education finance; and to promote research involving institutional financial resources and expenditures. The survey is conducted in compliance with the Center's mission "to collect, and analyze, and disseminate statistics and other data related to education in the United States", (20 U.S.C. 1221e-1, General Education Provisions Act, Sec. 406( b), as amended).

**USES OF DATA**

Survey results will be used in a variety of ways. For example, they will be used, together with other data, to describe the condition of postsecondary education in the nation. The information will be summarized by various institutional categories to detect any changes over the years in the sources of revenues and types of expenditures. Results will allow institutions to compare their financial data to national averages. The data will also be merged with other institutional data, such as enrollment and completions, to provide a valuable national resource for institutional research.

The definitions and instructions for compiling IPEDS data have been designed to minimize comparability problems. However, postsecondary education institutions differ widely among themselves. As a result of these differences, comparisons of data provided by individual institutions may be misleading.
