Definitions of Institutions

Institutional System. A complex of two or more institutions of higher education, each separately organized or independently administered, under the control of a single administrative body.

Multi-Campus Institution. An organization resembling an institutional system, but clearly designated as a single institution with either of two organizational structures: (1) an institution having two or more campuses responsible to a central administration (which central administration may or may not be located on one of the administratively equal campuses) or (2) an institution having a main campus with one or more branch campuses.

Main Campus. In those institutions comprised of a main campus and one or more branch campuses, the main campus (sometimes called the parent

institution) is usually the location of the core, primary, or most comprehensive program. (Unless the institution-wide or central administrative office for such institutions is reported to be at a different location, the main campus is understood to be the location of the central administrative office.)

Branch Campus. A campus of an institution of higher education which is located in a community different from that of its parent institution, that is, beyond a reasonable commuting distance from the main campus of the parent institution. To be considered a branch campus, rather than an extension center, the educational activities at the location must be organized on a relatively permanent basis (i.e., have a relatively permanent administration) and include course offerings for one or more complete college-level programs of at least one full year.
