The National Service-Learning Cooperative is a collaborative project between the National Youth Leadership Council, the University of Minnesota and thirteen other organizations and institutions, funded by the Corporation for National Service under Cooperative Agreement No. CA-001.
Introduction

America is changing. More of our citizens are moving into the "senior" portions of their lives. Within twenty years, a significant segment of our population will be retired or nearing retirement. With this retirement comes a tendency to live in retirement communities, separated from mainstream society. At the same time, our youth are experiencing greater isolation from adult life and from interaction with older individuals. Because of our mobile population, many children grow up today without regular contact with a grandparent or an older adult.

This scenario suggests that there is perhaps no greater need in our society than to connect young people with older Americans. Both have needs that can be served by the other, and together, they can serve the needs of the nation. Yet, developing effective intergenerational programs involves more than simply connecting the two groups.

The literature that follows provides important information about the issues and practices to be addressed as we implement high quality intergenerational programs. There is much that has been learned about the nature of good programs and how effective pairings begin and grow. Using this knowledge will enable us to develop one of the most important service-learning initiatives for the future.

Acquiring These Publications

The easiest and least expensive way to have access to the publications is through your local library. Even if you are not near a university research library, most smaller libraries have interlibrary loan (ILL) agreements at little or no cost to their patrons. The alternative to libraries is to go through commercial document reproduction and delivery services. These offer a convenient way to get copies of serial articles and other documents for those willing to pay for the service.

The following reproduction services are cited within the documents:

ABSTRACT: This paper contains 19 papers on volunteerism presented at a conference on aging. The papers, grouped into themes of trends and implications, resourceful roles, resources, and an agenda for the future, include the following: "Demographic Potential and the Quiet Revolution" (Opening remarks by Robert A. Harootyan); "Volunteers in the 1990s" (Keynote address by George Romney); "Resourceful Aging: Mobilizing Older Citizens for Volunteer Service" (Executive Summary and Commentary by Cynthia B. Costello); "Volunteerism by Elders: Demographic and Policy Trends, Past and Future (Susan M. Chambre); "Volunteerism: Resourceful Opportunities" (Judith V. Helein); "Overview: Trends and Implications" (James Sugarman); "Resourceful Securit Team Volunteers" (José Castro); "Intergenerational Programs: A Manual for Success" (Ramona Frischman); "Volunteering Business Expertise" (David C. Buffman, Sr.); "Older Adults: Volunteer Resources" (Maria P. Smith); "Retirees; Community Service Resources" Donna Anderson); "Volunteerism Legislation" (Thomas M. Kelley); "United Way and Senior Volunteerism" (Karen Heller); "Our Hope for the Future: America's Renewable Resource" (Trudy Cross); "Volunteerism in the Future: Service Credit Banking" (Hunter McKay); "Volunteerism: An Agenda for the Future" (Marian Heard); and "Volunteerism: Developing an Agenda for the Future" (Theodora Jackson). A directory of 32 programs and resources is included, as are the table of contents of the other 4 conference volumes.

ABSTRACT: This report presents the feelings, ideas, and recommendations of 349 individuals in Illinois who attended Circle of Helping meetings, seven regional meetings held in early 1990 to create momentum for intergenerational program development, to increase awareness of the benefits of intergenerational programs, and to emphasize the interdependence of generations. A summary of the meetings focuses on such issues as generational conflict and harmony, aging education, getting started, intergenerational communication, and public relations. A section on strategies for the future considers the possibility of schools in the future including older adults as an integral part of all educational levels. A total of 13 recommendations are made in the areas discussed in the summary section. One important aspect of the Circle of Helping meetings was to highlight model intergenerational programs already in operation; a section on intergenerational service-learning model programs briefly describes such programs in the areas of national intergenerational programs, day care, nursing home visiting, career days, adopt-a-grandparent/child, reading and literacy, tutoring, students serving seniors, latchkey programs, pen pals, mentoring, library programs, special events, guest lectures, oral history/interviewing/storytelling, patient simulation, social clubs and camps, drug abuse prevention, pregnancy prevention, advocacy, delinquency prevention, the arts, and health. Education model programs for the aged are also described.

ABSTRACT: This report examines the condition of America's young adolescents and how well middle grade schools, health institutions, and community organizations serve them. In its plan for action, the Task Force on Education of Young Adolescents of the Carnegie Council on Adolescent Development makes recommendations for new structures for middle grade education. A 15 year-old who has been well served in National Service-Learning Cooperative Clearinghouse
the middle years of schooling will be the following: (1) an intellectually reflective person; (2) a person en route to a lifetime of meaningful work; (3) a good citizen; (4) a caring and ethical individual; and (5) a healthy person. The report reviews the following recommendations for transforming middle schools: (1) create small communities for learning; (2) teach a core academic program; (3) ensure academic success for all students by shaping the educational program to fit the needs of students; (4) empower teachers and administrators to make decisions about the experiences of middle grade students; (5) staff middle grade schools with teachers who are expert at teaching young adolescents; (6) improve academic performance through fostering health and fitness; (7) re-engage families in the education of young adolescents; and (8) connect schools with communities. Eight figures provide various statistical data on adolescents. The following appendices are included: (1) a list of commissioned papers; (2) a list of working papers; (3) a list of consultants and their affiliations; (4) a list of their workshops and attendees; and (5) biographical sketches of task force members.

TITLE: Elder Mentors: Giving Schools a Hand.
YEAR: 1993
AVAIL.: NAASP Bulletin; v76 n549 p22-28, Jan 1993 (Reprint: UMI, UnCover)
ABSTRACT: Discusses a specific type of mentoring: matching retired, older persons with young people enduring a crisis period in their lives. Programs such as the Teaching Learning Communities (TLC) Mentoring Program in Ann Arbor, Michigan, assign elders as mentors and tutors to junior high school students in danger of dropping out. Strong elder-youth bonds positively affect youngsters' daily lives.

NOTES: 95p
ABSTRACT: This study examines the relationships between elder mentors and at-risk youth in the following exemplary intergenerational programs: (1) IUE/The Work Connection (Saugus, Massachusetts); (2) Teen Moms (Portland, Maine); (3) School Volunteers for Boston (Massachusetts); (4) Teenage Parent Alternative Program (Lincoln Park, Michigan); and (5) Teaching-Learning Communities (TLC) Mentors Program (Ann Arbor, Michigan). Information was obtained from site visits, a conference, interviews with professionals in the field of adolescent development, a review of the literature on adolescent institutions, and a brief review of intergenerational programming. Summary findings include the following: (1) primary and secondary relationships between elders and youth will form in programs designed for that purpose; (2) primary relationships are characterized by attachments approximating kinship, while secondary relationships maintained more emotional distance; (3) both elders and youth cited benefits from the relationships; (4) the most effective elders were those who had not lived what would be considered "successful" lives; (5) intergenerational bonds form because of shared emotional needs; and (6) programs were most effective when elders were placed in nonprofessional roles, given on-going support, and contact was structured. The appendices include a directory of the programs studied, a list of reviewers and the

experts interviewed, and a topic guide used in interviewing the older people. A 75-item list of references is also included.

ABSTRACT: National service offers an appealing vehicle for engaging senior citizens to respond to unmet needs in education, health care, public safety, the environment, and other essential areas. Involving seniors in national service will help alleviate the country's pressing domestic problems, enhancing participants' personal development, and bolstering the nation's flagging sense of community. A partial system of national service for seniors that began during the Kennedy administration demonstrated that seniors can provide essential community service, benefit through serving, and play an important role in service. Programs such as the Foster Grandparent Program and Senior Companions Program have also made it clear that senior service is not cheap and that obstacles and questions regarding key issues related to senior service persist. Despite the strides that have been made during the past 30 years regarding involving seniors in national and community service, the gap between promise and practice remains substantial. Achieving a vision of senior service that is substantially, but not exclusively, intergenerational requires action on the following fronts: strengthen the three programs currently providing the vast majority of senior service opportunities, embark on a period of innovation and experimentation, and build infrastructure at the national and local levels.

NOTES: 12p. Remarks to the National Association of Partners in Education (Baltimore, MD, March 21, 1989.)
ABSTRACT: Volunteers can make significant contributions in service to children and youth both by working on behalf of education and by augmenting the learning that schools provide. The merger of the National School Volunteer Program and the National Symposium on Partnerships in Education to form the National Association of Partners in Education is seen as an important development for voluntary activity and advocacy for youth. This presentation addresses four major points. First, the gap between adults and young people, due in part to changes in family structure and the inability of schools to cope with complex problems, calls for increased intervention and initiatives by volunteers. Second, mentoring programs can position volunteers to assist the educational enterprise by providing tutorial, social, and personal support; the role of caring adults is seen as increasingly important in the lives of young people. Third, fundamental principles underlying volunteer work with schools and young people include the notions of responsibility to the community and "interconnectedness," and voluntarism should promote commitment to helping others, as well as academic success, as integral to growth and maturity. Fourth, voluntarism in the schools must be expanded to other aspects of the lives of children and youth through links to the family and community.

NOTES: Theme issue with the title "Intergenerational Programs: Imperatives, Strategies, Impacts, Trends."
ABSTRACT: Intergenerational programs and policy approaches are needed for the following reasons: (1) the interdependence of generations; (2) the aging of the population; (3) the imperative of community participation and service; (4) changes in family structure and caregiving; and (5) stereotypes of intergenerational conflict and competition. Intergenerational exchange can contribute significantly to contemporary American society.

ABSTRACT: Change in self-understanding is used in this paper to structure an analyses of the experiential impact of a college-based, semester-long service learning project. Content analysis of students' journals indicated that they experienced four temporally distinct types of experiences, most of which revealed their prior assumptions to be inaccurate in guiding their interactions with older persons. Students had to reevaluate their understanding of themselves and their role in the intergenerational relationships and identify changes they could make to improve their relationships.

TITLE: Understanding How Youth and Elders Form Relationships: A Study of Four Linking Lifetimes Programs.
YEAR: 1992
AVAIL.: ERIC # ED348425
NOTES: 102p.
ABSTRACT: As part of a 4-year research initiative on adult/youth relationships programs, this study assessed relationships between elders and at-risk youth at the following four Linking Lifetimes intergenerational mentoring demonstration sites developed by Temple University’s Center for Intergenerational Learning in Philadelphia (Pennsylvania): (1) Neighborhood Youth Association in Los Angeles (California); (2) Metro Dade Department of Youth and Family Development in Miami (Florida); (3) Porter Leath Children’s Center in Memphis (Tennessee); and (4) Corporation for Public Management in Springfield (Massachusetts). Elders were 55 years old and older, and youth were 12 to 17 years old. Using 26 pairs of 1 youth and 1 elder, the study examined pair activities, the relationship formation process, and effective and ineffective practices in the relationships. Elders met between 4 and 10 hours a week with youth an received stipends and reimbursements for expenses. Separate face-to-face semi-structured interviews with all subjects were conducted at two times. Seventeen pairs were satisfying and 9 pairs were dissatisfying to the participants. The pairs’ particular activities did not determine satisfaction. Differences existed in participants’ interaction styles. Elders in satisfying relationships allowed the content and timing of the relationship to be youth-driven. Included are 5 tables, 33 references, and 2 appendixes describing the Linking Lifetimes initiative and study methodology in 2 tables.

ABSTRACT: Based on the premise that coalitions must be built if we want to move toward a society that involves all generations. Discusses the Illinois state model. Suggests that this needs to spread. Chapters include building coalitions to strengthen society, a chronology of the Illinois experience and coalition development in other states. Chapter IV discusses six reasons to start programs and build networks and V talks about the nuts and bolts of a statewide initiative and opportunities for linkage. There is a separate publication containing guides to Appendix material. The table of contents of the appendix lists 5 areas: beginning event, an invitational retreat; momentum; expanding coalitions; media and news and accomplishing objectives. Each section of the appendix contains discussion, figures, surveys and documents to help create the coalitions.

**ABSTRACT:** Community service learning was implemented in the Springfield Public Schools to develop and instill in all students an awareness, understanding, and appreciation of community, citizenship, and the responsibilities each citizen has to help others. The first section establishes links between community service learning and specific academic curriculum and then outlines a method of developing a program. The next five sections present model programs based on five themes: intergenerational, homeless or hungry, citizenship, community health and safety, and environment. Each model includes an overview and examples of how service experiences can become the focus of an activity in school and in the community. Each example details learning objectives and outcomes, potential service recipients, curriculum activities, reflection activities, and supporting resources.

**ABSTRACT:** In this practical guide to service learning, 21 contributors describe specific service-learning projects that have enhanced the curriculum in schools across the United States and that have improved student learning in the process. In the Foreword, U.S. Secretary of Education, Richard W. Riley, encourages schools to incorporate service learning into the curriculum. An introduction, "Changing Perceptions to Integrate Community Service Learning into Education" (Kinsley, McPherson) describes the roots of service. Part I on National Service-Learning Cooperative Clearinghouse
community service learning as a vehicle for active learning contains four chapters: "Literature in Language Arts: Quilting Lessons in the School Curriculum" (Keenan); "Inclusion and Community Service Learning: A Partnership" (Chamberlain); "Social Studies Moves into the Community" (Fellows); and "The need to Consider Service Learning in Developing Future Vocational Education Programs" (Silcox). Five chapters in Part II focus on changing the culture of the school through service learning: "Community Service Learning Is a Foregone Conclusion at the Lincoln Elementary School" (Boorstein); "Creating a School and Community Culture to Sustain Service Learning" (Allam); "How Do We Make a Difference in Our School and Community?" (Solo); "High School: Service Learning and a Caring School Community" (Reeder); and "Service Learning Honors Cultural Diversity" (Roberts-Weah). Part III has three chapters on service experiences that encourage teachers to facilitate learning: "Middle School: Intergenerational Experiences Support Teaching and Learning" (Laplante); "Enhancing Peer Mediation through Community Service Learning" (Messina); and "Students Take the Lead in AIDS Education" (Coar). Part IV focuses on the school as community partner: "Vision for the 21st Century: Seamless Relationship between School and Community" (Negroni); "Schools and Business Benefit Mutually through Service Learning" (Bookey); "Schools and Community Based Organizations: Partnerships Based on History" (Jackson); and "Youth Corps Makes Middle School Connection" (Harkavy). Part V on reflection contains two papers: "Reflection as a Tool for Turning Service Experiences into Learning Experiences" (Toole, Toole) and "Conclusion: Challenges for the Future" (McPherson, Kinsley). Part VI contains these service learning resources: lists of community service learning centers, national organizations, and resource books and other materials; description of "The Service Learning Planning and Resource Guide"; and standards of quality for school based service learning.

ABSTRACT: This guide describes intergenerational programs and provides ideas for initiating and implementing informal and formal interaction between youth and senior adults. Intergenerational programs can help dispel negative stereotypes that youth and older adults may have about each other. Successful programs provide rewarding experiences for both generations and opportunities for sharing skills, knowledge, experience, and promoting friendship between youth and older adults. In addition, gaps in the service network of private and public social agencies can be identified and filled through intergenerational volunteers. This guide discusses a program development process that addresses the following topics: (1) identification of top priority community needs and resources; (2) identification of a program sponsor and mobilization of volunteer resources; (3) forming a planning and advisory committee; (4) developing a plan for the program sponsor; (5) operational considerations; (6) types of projects (youth initiated, older person initiated, and joint youth and older person initiated; (7) project evaluation; and (8) recommendations for planning effective intergenerational programs. Also provided are suggestions for working with senior adults and involving minorities in developing programs for the elderly. A 25 item bibliography on intergenerational relations is included.

TITLE: Intergenerational Dialogues: A Tested Educational Program For Children.
YEAR: 1981
AVAIL: Educational Gerontology; v7 p383-396
ABSTRACT: Children's attitudes about growing old and about the elderly themselves are in large part influenced by negative images projected by the media and through lack of actual experience in interacting with older people. To counter this situation and to provide an opportunity for positive attitude shift, an educational program has been developed by 10- and 11-year-old students. Growing Up-Growing Older is a developed unit of instruction relying on a package of software including films and printed support materials. A strong experiential component is provided through structured intergenerational dialogues, facilitated by visiting older volunteers. The program was field tested using both a treatment and control population. Survey methodology was used to determine pre- and post-experience stages of attitude awareness and understanding of the elderly. Although the study population did not demonstrate the level of negative attitude we had anticipated from the literature, post-experience testing indicated a positive shift. More significant is the demonstrated increase in level of awareness of aging issues and of older persons as a result of the educational experience. Finally, the treatment population increased significantly the percentage of old people they interacted with outside the classroom. This increased familiarity and awareness of the elderly can be expected to continue to produce attitudes based more on fact than on fancy.

YEAR: 1993
AVAIL: UMI InfoStore, UnCover
ABSTRACT: Community service links the school with society and should be part of the middle level curriculum. Ediger's article describes three sixth grade community service projects involving a nursing home entertainment program, the police department, and a trash awareness project. Hamilton and Hanna describe a "points of light" project involving middle school students' ongoing assistance to elderly nursing home residents.

**YEAR:** 1989  
**AVAIL:** ERIC # ED350126  
**NOTES:** 24 p.  
**ABSTRACT:** This document describes the intergenerational project conducted in the Cedar Falls Public School System (Iowa) that involved senior citizens and youths in a learning and sharing process. The county-based extension service supported by faculty at Iowa State University assisted in the recruitment and training of senior citizen volunteers. Implemented intergenerational activities include: (1) students developing interviewing skills by interviewing three senior volunteers; (2) celebrating Black History Month by inviting three Black senior citizens to tell students about their family histories; (3) learning about pioneer days by involving senior volunteers in teaching students about whittling, candle dipping, genealogy, Indian history, Black history, quilting, and other traditional arts and crafts. Evaluation of the project indicated that 20 senior volunteers contributed more than 407 hours to the project. Over 600 students in grades 4-7 took part with 2,229 contact hours of teachers with students. Nine schools were involved, along with 3 principals, and 19 teachers. Recommendations for successful replication of this project include.

ABSTRACT: This project was conducted as an experiment in the implementation of the guidelines set up by the agents' manual of the Texas study, SKILLS (Seniors and Kids Involved in Learning Life's Skills). Objectives of the intergenerational program included the following: (1) to further the work started by the SKILLS study, (2) to offer a variety of opportunities for helping the young and "young at heart" to develop new modes of communication, (3) to offer opportunities for interaction in a learning and helping atmosphere in a two way relationship, (4) to develop guidelines for a learning laboratory, (5) to increase community involvement in the Cooperative Extension Service, (6) to enhance the spirit and mental well being of older adults, (7) to develop an advisory planning committee, and (8) to identify and catalog the senior citizen organizational network within Prince George's County. Guidelines and recommendations are given for compiling the senior citizen network guide, contacting 4H teenagers, contacting senior citizens, and bringing each together for some type of activity. (The SKILLS program description and questionnaires used by the project are appended.)

NOTES: 60 p.
ABSTRACT: SerVermont is a volunteer program for high school students. The program stresses public service in the community and is intended to teach students the value of personal volunteer service to their local communities. During SerVermont's first year of operation, 11 high schools were awarded minigrants to be used in developing programs in which student volunteers would work to improve their local communities. The following programs were initiated: a program in which teams consisting of high school students and a senior citizen or faculty member organized annual spring and autumn clean-ups of senior citizens' yards and houses; a program in which special education students took part in improving a local outdoor recreation area; a program to clean up the community common; a seat belt education campaign; a community service auction; a program in which high school students staged a musical performance for local senior citizens; a project in which woodshop students are making welcome signs for their town; a leadership forum to honor senior citizens who have made some important contribution to their town in the past; a student-sponsored combination art exhibit, concert, and luncheon for senior citizens; a library aide program to help other students improve their study and research skills; a local history presentation to help elementary school children become familiar with their town and learn the alphabet at the same time; an intergenerational school luncheon program; and a greeting card and letter writing program in which students correspond with senior citizens on special occasions. (Appendixes comprising two-thirds of the document include miscellaneous program memos, a sample program inventory sheet, a list of SerVermont minigrant winners and contacts, a program announcement and application, an expenditures memo, and assorted news articles about SerVermont.)

ABSTRACT: This book presents 7 case studies of middle school youth service programs that challenge their participants to change from takers to givers and from observers to active members of the community. Chapter 1 discusses new ways for responding to the needs of middle school youth and promoting community service. Chapter 2 describes a tutoring program in which Hispanic at risk middle school students tutor Hispanic at risk elementary school students. Chapter 3 describes a combined academic and community alternative for potential dropouts. Chapter 4 describes a program that helps keep middle school youth from being recruited into gangs. Chapters 5, 6 and 7 describe, respectively, programs that bring youth into nursing homes to enrich the lives of the elderly and to increase the understanding of the old by the young; involve junior high school students in community service projects; and place students in a school based community service program. Chapter 8 describes the integration of community service with learning in 40 schools; while Chapter 9 discusses lessons learned from the case studies in terms of youth services issues and new directions for middle school students. The book contains 2 brief forewords by Senator Dave Durenberger and Senator Edward M. Kennedy respectively. Related materials and a directory of case study programs are appended.

ABSTRACT: Texas rates among the top 10 states for school dropouts with an annual dropout rate of about 30%. Some dropout prevention programs are incorporating community service components as a means to counter the alienation and low self-esteem frequently seen among dropouts and at-risk students. Significant adults other than school personnel provide youth with linkages to a community's heritage and culture. The Youth Exchanging with Seniors Project (YES) is a pilot project designed to link youth with rural elderly through community-based service programs in 20 West Texas counties. With few human services available in this sparsely populated area, innovative grass-roots projects must be initiated to address the long-term care needs of aging frail elders. The group of age 60 and over comprises 15-23% of the population in 16 of these counties. YES proposes to organize members of 4-H and Future Homemakers of America. The project will provide the elderly with services such as housekeeping, yard and garden maintenance, minor home repair, grocery shopping, errands, and pet care. Participation in the project will give youth the opportunities to develop a better sense of self, meaningful social and community awareness, and positive attitudes toward the elderly. Project services also will help the frail elderly to maintain an independent living style. As a result, the YES project may provide a model for linking at-risk youth with significant adults through community service.

ABSTRACT: This guide to implementing a school volunteer program was developed for the 1995 Wisconsin Volunteer A-Thon project, which was intended to encourage individuals, schools, organizations, and corporations to volunteer time to youth and education. Part 1 contains a timeline for the implementation of the project, a description of how to participate, pledge forms for schools and volunteers, and a reproducible certificate of appreciation. Part 2, Adult Volunteers in the School, includes information on how to start, design, and organize a volunteer program; contains a sample school board policy on school volunteers, and includes a teacher's guide to using and recognizing volunteers, ideas for involving retired persons, and planning intergenerational programs, and a discussion of risk management and resources for volunteer risk management. Part 3, Youth Service Learning, discusses service learning contracts, the elements of effective service learning activities, ways to integrate service learning into the curriculum, and other ideas for organizing community service projects. Part 4 contains eight appendices: A Family Community Schools Partnership Framework; a checklist for schools; a sample survey of interest for volunteers; a sample volunteer screening reference letter; a sample volunteer's emergency information form; a sample volunteer's evaluation of short term school program form, and a sample of a school volunteer's evaluation program form.
