  • County, city, zip code
Geography

Geography is central to the work of the Census Bureau, providing the framework for survey design, sample selection, data collection, tabulation, and dissemination. Geography provides meaning and context to statistical data.

Latest

Maps & Data

TIGER Products
Spatial extracts for use in GIS software from the MAF/TIGER database, containing features such as roads, rivers, and legal and statistical geographic areas.

TIGERweb
A web-based application giving users a way to view geographic data, including roads, rivers, legal and statistical areas, without having to download data.

Reference Maps
Reference maps easily show the boundaries and names of geographic areas for which statistical data is tabulated.

View All Maps & Data
The Census DataMapper is a mapping application intended to provide users with a simple interface to view, save, and print county-based demographic maps of the United States.

Reference Maps
Reference maps are designed to show the geographic locations of features and boundaries. These maps usually contain features, such as roads and rivers, and boundaries, such as county, place, census tracts, or many more. These maps do not contain demographic data and are used solely to show the location of and relationships between boundaries and features. For interactive reference maps see TIGERweb.

Thematic Maps
Thematic maps are designed to show demographic, economic, business, or socioeconomic data about or characteristics of an area. Thematic maps tell a story spatially. They show a theme, or special topic, for a geographic area. Thematic maps may use features from reference maps as their base and then display additional data to tell a story about that area.

Maps Available for Purchase
A list of maps for purchase. Many of our maps are available to purchase in wall size format.
Census Data Mapper

The Census Data Mapper is a web mapping application intended to provide users with a simple interface to view, save and print county-based demographic maps of the United States. The data are from the 2010 Census.

Please click on the image or link below to launch the application.

Application Requirements:
- To view this application, you will need the Adobe Flash Player available for free from Adobe.
- To save and print a map, you will need the Adobe Reader available for free from Adobe.
- To save tabular data, you will need Microsoft Excel or the Microsoft Excel Viewer available for free from Microsoft.

Related Topics

Metropolitan & Micropolitan Statistical Areas
This site provides information about metropolitan and micropolitan statistical areas, including current and historical delineations and selected data products.

On The Map
This analysis tool presents LODES data and shows where workers are employed and where they live through an interactive and flexible mapping interface.

Census Flows Mapper
This interactive map shows U.S. migration patterns by county. Hover over the results on the map for more information.

Around the Bureau

SAIPE Map Viewer
The Small Area Income and Poverty Estimates (SAIPE) map viewer provides the ability to quickly and easily view small-area modeled data in map form.

American Community Survey
The American Community Survey (ACS) is an ongoing statistical survey that samples a small percentage of the population every year.

American FactFinder
American FactFinder provides access to data about the United States, Puerto Rico and the Island Areas. The data come from several censuses and surveys.

Most Popular

TIGER Products
Spatial extracts for use in GIS software from the MAFF/ TIGER database, containing features such as roads, rivers, and legal and statistical geographic areas.

Gazetteer Files (2010 Census)
These files provide lists of several types of geographic areas with 2010 population and housing unit counts, land area, and internal points.

Guide to State & Local Census Geography
A web publication that describes basic geographic information about each state or equivalent, including land area, density, capital, and bordering states.

Scroll Down
The Census Flows Mapper is a web mapping application intended to provide users with a simple interface to view, save and print county-to-county migration flows maps of the United States. The data are from the 2006-2010 and 2007-2011 American Community Surveys.

Please click on the image or link below to launch the application.

Public Data Application Programming Interface (API)

The BLS Public Data API gives the public access to raw economic data from all BLS programs.

About the Tools

- Allows users to quickly retrieve BLS time series data from lists of those most commonly requested.
- This application requires a Java-enabled browser. Choose the data you want from BLS databases on a simple, one-screen form.
- A form-based query application which allows you to obtain BLS time series data based on choices you make.
- A link to the BLS Download server. Given the limitations on the amount of data which can be extracted using any of the applications provided on the Web site, the Download server can be ideal for those users requiring large volumes of time series data.
