The repository is a service of University of Wyoming Libraries. Research, scholarly, and creative output included here has been selected and deposited by the faculty, researchers, and students of the University of Wyoming. WySR, Wyoming Scholars Repository, is part of the larger Open Access movement to transform scholarly communications.
Dear Faculty in the College of Engineering and Applied Sciences:

In an effort to increase the visibility of your scholarship, maximize its research impact, and contribute to worldwide accessibility, the UW Libraries are proud to announce their recent initiative, the Wyoming Scholarly Repository (WYSR).

WYSR is an open access institutional repository highlighting scholarship at the University of Wyoming. You can view WYSR at http://repository.uwyo.edu.

Content housed in WYSR consists of a variety of scholarly works, including published articles, associated grey matter, professional grade peer-reviewed electronic journals, and conference platforms with papers.

There are many benefits to having your work archived in the Wyoming Scholars Repository:

- **Maximizing discoverability**: This platform is optimized for visibility through Google Scholar, and other search engines, resulting in your scholarship being highly visible and easily discoverable by students and colleagues around the world.
- **Maximizing downloads**: Research indicates that online open access articles are the most frequently viewed, downloaded, and cited publications.
- **Funding opportunities**: Federal funding requirements for open access - archive publications in our institutional repository and make your research publicly available.
- **Paywall utilization**: Each full-text article assigned a URL that may be easily shared.
- **Usage feedback reports**: Statistics are attached to your materials, showing exactly how often each of your posted documents has been downloaded.

This initiative is being offered by the Wyoming Scholars Repository to highlight scholarship at our university. We plan to seek departments within the College of Engineering and Applied Science during the spring 2023 semester to provide further information and assistance.

Please feel free to contact us with any questions.

In an effort to enhance the visibility of your scholarship, enable its research impact, and contribute to the digital humanities, the UW Libraries are pleased to announce a new service to faculty. The University of Wyoming Libraries is launching the new SHERPA/RoMEO service to track and inform you about the copyright policies of your publishers. This service is designed to help faculty find resources to support your scholarship and to ensure that your work is accessible to the world.

**For more information:** [http://researchstaff.uwyo.edu](http://researchstaff.uwyo.edu)

---

**To submit a request:**

1. Log in to your SHERPA/RoMEO account with your UW NetID and password.
2. Select your department or college.
3. Enter the title of the journal or book.
4. Submit your request.

---
