Fort Hays State University

- ▶ <http://scholars.fhus.edu>

- Electronic Theses
- Undergraduate / Graduate Research
- Journals, Newsletters, Events
- Faculty Research (Faculty peer-reviewed journal articles)
- Open Educational Resources
- University Archives & Special Collections

Institutional Need for an IR

- ▶ **What is an IR?**
 - ▶ Collecting, preserving & disseminating scholarship
 - ▶ Publish & showcase institutional scholarship
- ▶ **Role of an IR**
 - ▶ Manage open access to digital content produced by the university
 - ▶ Encourages knowledge sharing
 - ▶ Permits quick and easy dissemination of scholarship across institutions

Gold vs Green OPEN ACCESS

► Gold Open Access

Gold or “pay” to publish Open Access

- Articles is made freely accessible online to anyone anywhere immediately upon publication
- Authors, their funders or institution pay an article publication charge for every article published

► Green Open Access

“Self-Archiving”

- Depositing a **free** copy of a digital document on the internet in order to provide open access to it
- Access without payment to a version of the publication via a repository, often after an embargo period.

Institutional Repositories - Why we need them...?

- ▶ Showcase scholarly works
- ▶ Create a public forum
- ▶ Maximize research impact through searching
- ▶ Manage & preserve digital collections
- ▶ Increase professional visibility

Benefits:

- ▶ Broader dissemination & increased access
- ▶ Supports faculty/student success

The Intelligent Troglodyte's Guide to Plato's Republic
Douglas Drabkin

The *Republic* of Plato is one of the classic gateway texts into the study and practice of the sort of book that has been able to arrest and redirect the mind to do this, and whether or not it will be able to do this in the end you can only discover for yourself. The present edition is intended to get you fairly deep, fairly quickly, into the project. It is organized into sections and provides commentary on each section as well as a table of contents and a system of navigating bookmarks. Links to external resources in the Classical Library are used throughout. This book is intended for use in or independent study.

Abstract
A greater abundance of shrubs in semiarid grasslands affects the spatial patterns of soil temperature, moisture, and litter, resulting in fertile islands with potentially enhanced soil mesocosm activity. The goal of this study was to quantify the microsite specificity of soil respiration in a semiarid riparian ecosystem experiencing shrub encroachment. We quantified the response of soil respiration to different microsite conditions created by big mesquite shrubs (near the trunk and the canopy edge), medium-sized mesquite, sacaton bunchgrasses, and open spaces. We hypothesized that soil respiration would be more temperature sensitive and less moisture sensitive and have a greater magnitude in shrub microsites compared with grass and open microsites. Field and incubation soil respiration data were simultaneously analyzed in a Bayesian framework to quantify the microsite-specific temperature and moisture sensitivities and magnitude of respiration. The analysis showed that shrub expansion increases the soil respiration response to temperature, but decreases the response to

Degree Name
Master of Science (MS)

Department
Chemistry

Abstract
The main objective of the thesis is to understand the effect of morphologies and electrolytes on the electrochemical properties of cobalt sulfides. The nanostructured cobalt sulfides were synthesized by a facile hydrothermal method. For this, cobalt nitrate $\text{Co}(\text{NO}_3)_2 \cdot \text{H}_2\text{O}$, cetyl trimethylammonium bromide (CTAB), thioacetamide (TTA), poly (vinyl pyrrolidone) (PVP) and ethylene glycol were used. The effect of growth parameters such as solvent and presence of surfactants on the size and morphology of the cobalt sulfides were investigated. It was observed that these variations could provide cobalt sulfides with a range of sizes, shapes and morphologies. The nanostructured cobalt sulfides were structurally and electrochemically characterized using various techniques. The structural characterizations were performed using X-ray diffraction (XRD) technique. The XRD analysis showed mixed phases of cobalt sulfides such as CoS and CoS_2 . The morphology and size of the cobalt sulfides were studied using scanning electron microscopy (SEM). It was observed that the morphology and the size of the cobalt sulfides depend on the growth conditions. The crystallite size of the cobalt sulfide was estimated using XRD data. Energy-dispersive X-ray spectrometer (EDS) was used to further confirm the cobalt sulfide formation.

15th Kentucky Volunteer Cavalry Regiment, Company F, Records, 1862-1864
Special Collections, Leonard H. Axe Library
A collection of volunteer enlistments, payroll accounts, certificates of release, company descriptive book, company clothing book, quarterly return of clothing and camp garrison equipment for the 2nd, 3rd, and 4th quarters of 1863, ordnance and ordnance stores reports for the 3rd quarter of 1863 and the company muster roll for the 15th Kentucky Volunteer Cavalry, Company F.

American Association of University Women, Pittsburg Branch, Records, 1926-1973
Special Collections, Leonard H. Axe Library
Records of the Pittsburg, Kansas, branch of the American Association of University Women. The records consist of newsletters, scrapbooks, membership lists, programs, histories, correspondence, financial records, photographs, by-laws, and related materials.

Barnes, Debra Dene Collection, 1965-2008
Special Collections, Leonard H. Axe Library
A collection of materials relating to Debra Dene Barnes, a native of Moran, Kansas and student at Kansas State College of Pittsburg, who was chosen as Miss Kansas 1967 and then went on to win the Miss America 1968 Pageant. The collection consists of newspaper clippings, scrapbooks of news clippings, photographs, various pageant programs, and other papers and photographs relating to the time she spent as a student at Kansas State College of Pittsburg and her tenure as Miss Pittsburg State 1967, Miss Kansas 1967, and Miss America 1968.

Bays, Bertie Cole (1899-1972), Collection
Special Collections, Leonard H. Axe Library
A collection of records relating to Bertie Cole Bays that includes correspondence, poetry manuscripts, newspaper clippings, programs, and miscellaneous materials.

Description

Here in Wyoming we're surrounded by these famously beautiful mountains, and the natural environment seems to be integral to Laramie's character. So started thinking of Laramie as an outward facing city, looking out toward the other Laramie's, the Laramie River, the Laramie mountain range, Laramie Peak. But it feels incomplete to define a place based just on its landscape, its access to or vantages of other places. So, this landmarks landscape map attempts to show Laramie in the context of its environment by giving a visual map both of spots where you can see the mountains merging into the city and of what else you might use as landmarks when the mountains aren't in view.

Facial Recognition of Dark Triad Traits and the Link to Prenatal Androgen Exposure

Taylor Willits, Fort Hays State University
Arianne Fisher, Fort Hays State University

Department: Psychology
Additional Mentor: Dr. Trey Hill

Description
The Dark Triad is a personality construct composed of psychopathy, Machiavellianism, and narcissism that is commonly associated with a variety of undesirable behaviors. High prenatal androgen exposure has been associated with various behavioral and personality characteristics also commonly found in individuals high in the Dark Triad. This may suggest a link between prenatal androgen exposure and the development of the Dark Triad. Additionally, previous research has found that the faces of individuals high in the Dark Triad are able to be identified at rates significantly better than chance. This identification may indicate evolutionary benefits associated with facial recognition of Dark Triad traits, particularly within the realm of mating. A total of 66 students were shown a slideshow with composite faces of individuals high and low in psychopathy, Machiavellianism, narcissism, intrasexual competition, and short- and long term mating. Participants were asked to mark which face was most expressive of each trait on a 6-point scale. They completed the Dirty Dozen measure of the Dark Triad, and their 2D:4D ratios were also measured. Our hypothesis that individuals high in the Dark Triad would be better at identifying high Dark Triad faces was not supported. However, in accordance with evolutionary advantages, females high in the Dark Triad were worse at identifying males high in long-term mating, and narcissistic males were better at identifying females high in short term mating. No relationship between low 2D:4D ratio (indicating higher prenatal androgen exposure) and the Dark Triad traits was found.

Faculty Participation

- ▶ Encouraging faculty to add their scholarship
- ▶ Faculty promoting undergraduate & graduate research
 - ▶ Class papers / projects
 - ▶ Research Colloquium
- ▶ Outreach
 - ▶ Workshops
 - ▶ Tutorials/Guidelines
 - ▶ Professional Development Day presentation
 - ▶ Informational brochures

Conclusion

- ▶ Showcase research produced by the university community
- ▶ Digital collection building
- ▶ Access to digital collections
- ▶ Use of IR materials
- ▶ Long-term preservation

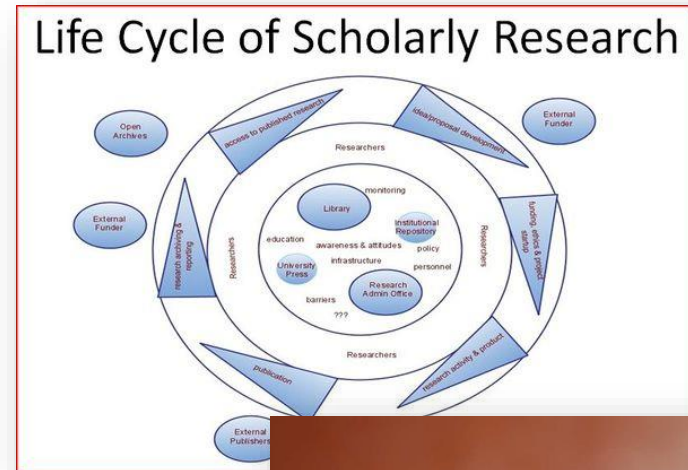

The image displays two screenshots of digital commons websites. The left screenshot is for Pittsburg State University Library Services Digital Commons. It features a header with the university logo and a navigation bar. Below the header, there is a section titled "Browse Research and Scholarship" with a "Follow" button. A link for "Research unit, center, or department" is provided. A paragraph describes the repository's purpose. A circular chart shows "Explore works in 45 disciplines". To the right, there are sections for "At a Glance" (Top 10 Downloads, Recent Additions) and "Paper of the Day" (An Attempt to Determine the Effects of Lateral Dominance on Reading Ability by Bernice J. Bloomberg).

The right screenshot is for Fort Hays State University FHSU Scholars Repository. It features a header with the university name and repository title. A navigation bar includes links for Home, About, FAQ, and My Account. A search bar is present with a "Search" button. Below the search bar, there are sections for "Featured Research" (Research unit, center, or department; Journals and peer-reviewed series; Open Educational Resources; Archives Online), "About the Repository" (Follow button), "At a Glance" (Top 10 Downloads, Recent Additions), and "Paper of the Day" (The Intelligent Troglodyte's Guide to Plato's Republic by Douglas Drabkin). A footer shows statistics: 275 papers to date, 642 full-text downloads to date, and 642 downloads in the past year.

- ▶ Understand aspects & challenges of IR initiatives

- ▶ Supporting the cycle of

- ▶ Knowledge
- ▶ Discovery
- ▶ Use
- ▶ Creation
- ▶ Dissemination
- ▶ Faculty & Student Research

- ▶ Collaboration between the Library and Campus Departments

Deborah L. White, MLIS, dlwhite@pittstate.edu

Digital Resources and Initiatives Manager, Pittsburg State University

Yumi Ohira, MLS, MFA, y_Ohira@fhsu.edu

Digital Curation Librarian, Fort Hays State University
