**LONDON, Dec. 29** — Record-breaking swimmer Nina Akhtar has crossed the Nile River, swimming from the Aswan Dam to Luxor in just 24 hours. Akhtar's feat has been met with widespread acclaim, with many praising her bravery and determination.
Domestic Sources Of Financing Development Programs

The LANGUAGE PRESS

Domestic economic policies are often viewed with suspicion in the developed world, particularly in countries with a history of high inflation and unstable economies. However, in other parts of the world, particularly in developing countries, domestic sources of financing development programs are crucial. The following are some of the main sources of funding:

1. Domestic budgetary allocations: Governments allocate a portion of their budget to development programs. This can include capital expenditures, social programs, and infrastructure projects.

2. Domestic savings: Domestic savings, both public and private, provide a significant source of funding for development. These savings can be used to finance development projects and programs.

3. Domestic credit: Domestic credit, provided by banks and other financial institutions, can also be a significant source of funding for development. This can include loans to businesses, individuals, and government agencies.

4. Domestic taxes: Domestic taxes, such as corporate taxes, personal income taxes, and value-added taxes, provide a steady source of funding for government programs.

5. Domestic utility payments: Payments for utilities, such as electricity and water, can also provide a steady source of funding for government programs.

6. Domestic remittances: Remittances from abroad can provide a significant source of funding for development, particularly in countries with a large diaspora.

7. Domestic grants: Grants from domestic sources, such as foundations and NGOs, can also provide significant funding for development programs.

In conclusion, domestic sources of financing development programs are crucial for developing countries. These sources provide a steady and reliable source of funding that can be used to support economic growth, social development, and infrastructure projects.

Field Trips And Scientific Expeditions For University Students

The faculty at the Kabul University, in cooperation with the Ministry of Education, is organizing a series of field trips and scientific expeditions for university students. These trips are designed to provide students with hands-on experience in scientific research and to expose them to the diversity of Afghanistan's natural and cultural heritage.

The trips will be led by faculty members and will cover a range of scientific disciplines, including biology, geology, archaeology, and anthropology. Students will have the opportunity to work with professional scientists and gain firsthand experience in scientific research.

The trips will be held in various locations throughout Afghanistan, including mountain ranges, deserts, and coastal areas. Students will have the opportunity to observe and study a range of plant and animal species, as well as to learn about the history and culture of the local communities.

The trips are open to all university students, and interested students can apply for participation through their department. The trips will be held on a regular basis, with the first trip scheduled for the spring semester.

The goal of these field trips and scientific expeditions is to provide students with hands-on experience in scientific research and to expose them to the diversity of Afghanistan's natural and cultural heritage. These trips are an opportunity for students to gain firsthand experience in scientific research and to develop skills that will be valuable in their future careers.
**Swimming Girl**

(Comed. from page 1)

Of course, there were no details beyond the deaths of two of the three. All we knew was that the bodies of the two men were found at the bottom of the pool, while the third victim was still floating in the water. The circumstances surrounding their deaths were unclear, but it was believed that they had drowned while attempting to swim against the current.

**Plot To Overthrow Tunisian State Discovered**

**14:00**

**Saturday, December 22, 1962**

About 30 people have been arrested in connection with a plot to overthrow the Tunisian State, which was revealed this morning.

De Gaulle Key For W. European Unity, Says New York Times

**11:45**

**Saturday, December 22, 1962**

The plot to overthrow the Tunisian State was discovered today. The group was made up of 30 individuals who were said to be sympathetic to the aims of the opposition party, the National Democratic Front, which seeks to overthrow the current government and establish a democratic regime.

The group was arrested by the Tunisian authorities, who uncovered evidence of their plans. The arrests were made in an operation coordinated by the French authorities, who have been involved in the investigation.

The plot was discovered after a tip-off from an informant who had been working for the opposition party. The informant had provided information to the authorities about the group's activities.

**Super-Detecting U.S. Device Might Solve Problem Of U.N. Nuclear Test Detection**

**11:45**

**Saturday, December 22, 1962**

A new device developed by the U.S. government could help solve the problem of detecting nuclear tests conducted by other nations. The device uses advanced technology to detect and identify the signature of a nuclear explosion, which can be used to verify compliance with international agreements.

The device was developed by the U.S. government as part of its efforts to enhance its nuclear surveillance capabilities. It is designed to detect and identify the signature of a nuclear explosion, which can be used to verify compliance with international agreements.
