Nebraska Historical Population Report

- **Annual State Population Counts since 1900**
- **Annual State Components of Population Change since 1930**
- **Decennial State Sex and Age Pyramids: 1900 to 2000 plus 2006**
- **County and Place Year of Highest Census**
- **Decennial Sex and Age Subgroup Populations: 1950 to 2000**
- **Annual County Births, Deaths, and Natural Change 1949 to 2005**

HIGHLIGHTS

This report shows decennial census counts and annual estimates of the population for Nebraska and its counties and cities. Demographic patterns and trends, including changes in the components of population change, are illustrated. An evaluation of where we have been demographically over time may show us where we are headed as a state. It is important to see how changes have been occurring at both the local and statewide level. A summary of important aspects to note as one peruses the tables and figures in this report follows below:

- The state's population has grown in 82 of the 106 years between 1900 and 2006. Most of the years having population declines occurred during World Wars I and II or during or immediately following the Great Depression. The state's population has grown every year since 1987. (Figure 2)
- The rate of population growth within Nebraska since 2000 has averaged about 0.5 percent annually. This growth rate is similar to the mid 1970s to mid 1980s while annual growth rates were around 1.0 percent during the 1990s. The current rate of growth within Nebraska is about half of the overall U.S. growth rate. The last time the annual growth rate in Nebraska was higher than the overall U.S. average was 1961. (Table 1, Figure 3)
- Nebraska continues to gain population through natural increase—the annual number of births being larger than the annual number of deaths. Net migration has tended to vary, with some years having net inmigration, while net outmigration has occurred in other years. The level of net migration is typically lower than that of natural change. (Table 2, Figures 4 and 5)
- When looking at the percentage of the population of males and females by 5-year age groups, Nebraska had a linear "age pyramid" in 1900 and 1920, where the percentage declined for increasingly older age groups (lifespan effect). The base of the pyramid started to invert due to lower births during the 1930s before the base was broadened during the baby boom (1946-1964). (Age pyramids)
- Older age categories (70+) have a larger percentage of the Nebraska population than in past decades. A look at the current 2006 age pyramid shows how the depression cohorts, leading and training edges of the baby boom, and baby boom echo (kids of baby boomers born 1977-1992) effect these older age groups as well as other groups such as kids under 5 and prospective college students. (Age pyramids)
- Rankings of Nebraska counties by population show dramatic shifts over the decades. Sarpy County, the third most population county in 2000, only ranked as the 55th most populous county in 1920. Conversely, Gage County consistently ranked third highest in the early 20th Century but ranked 14th in 2000. Many counties in the western part of the state had low rankings in the early 1900s but increased as the area was settled further. These rankings depict migration and settlement patterns within Nebraska. (Table 5b)
- A plurality of Nebraska counties peaked in population in either 1920 or 1930, with another third of the counties peaking prior to 1920. Only 14 counties grew to have their largest ever population in 2000. Each of these counties was either part of a metropolitan area or was considered micropolitan (non-metropolitan with a city of at least 10,000 residents). (Table 6)

- In 2000, 38 counties had less than half of their peak Census population. These counties tended to be located along Nebraska's southern border as well as in the Sand Hills. Additionally, 2000 population counts show about two-thirds of Nebraska counties (63) had less than 70 percent of their peak population. (Table 7 and County Map)
- One-third of Nebraska's population lived in its 60 smallest counties in 1920, versus only 15 percent in 2000. Likewise, the percentage of the population living in the 80 smallest counties went from about 60 percent in 1920 to just over 30 percent in 2000. Nebraska's three largest counties (Douglas, Lancaster, and Sarpy) were home to about half of Nebraska residents in 2000, versus only about a quarter residing in the three most populous counties in 1920. (Figure 6)
- Half of Nebraska's counties have lost 30 percent or more of their population since 1950. (County Map)
- All 93 Nebraska counties had a natural increase (births greater than deaths) in calendar years 1950 and 1960 (baby boom). This number dipped to 65 counties in 1970 before rebounding to 84 in 1980 (baby boom echo). More recently, 50 counties had a natural increase in 2000 and less than half of the counties (45) did in 2005. (Table 14)
- One in six Nebraska towns had less than 100 persons in 2000, versus one of every 100 towns being this size in 1910 and 1920. (Table 16 and Figure 7)
- More than 90 percent of Nebraska cities and towns have had fewer than 2,500 residents every decade since 1880. However, while these "small" towns comprised roughly 40 percent of the population residing in towns between 1880 and 1920, they only make up 17.4 percent of city-dwellers in 2000. (Table 16)
- The shift to living in larger cities is apparent in the percentage of the city-dwelling population living in towns with 10,000 or more persons having steadily risen since 1920 while steadily falling in towns with fewer than 2,500 residents. (Figure 8)

Table 1: Annual Population Estimates and Changes from Previous Year: U.S. and Nebraska

[1]The state counts are final resident counts. In December 2000, the Census Bureau released Nebraska's reapportionment count at 1,715,369. This number includes persons who are U.S. military or federal employees and their dependents stationed overseas and who listed Nebraska as their home state.

[2]The 1990 population totals for Nebraska as well as Howard, Knox, Merrick, and Polk Counties are corrected counts. The Census Bureau issued corrected population counts for these areas after the original 1990 counts and associated data products were published. Other detailed population tabulations were not revised to reflect the corrections, so the final counts reported here will differ slightly from the population totals in other tabulations.

[3]The state total is more than the sum of the counties because several areas never had a legal existence and were dropped or reorganized in subsequent years.

[4] The 2000 Census figure for Red Willow County was corrected, resulting in an increase of 2 people. The 2000 population counts listed do not reflect a change in the boundary between Platte and Butler Counties which took effect Jan. 1, 2001. This boundary change would effect the Census figures as follows: Butler gains 96 people while Platte loses 96.

Table 5b: Ranking of Nebraska's 93 Counties by Highest Population: 1860 to 2000 Censuses

County	2000	1990	1980	1970	1960	1950	1940	1930	1920	1910	1900	1890	1880	1870	1860

Note: The 1950 figures were summed manually from printed reports. The sum for the state of Nebraska showed 130,379 persons age 65 and older. The county figures, however, summed to 130,380. This discrepancy is believed to be a typo in the printed report that cannot be traced.

Table 10: Females Age 15 to 44 and Percent of the Total Population: 1950 to 2000

Note: The 1950 figures were summed manually from printed reports. The sum for the state of Nebraska showed 279,860 females age 15 to 44. The county figures, however, summed to 279,861. This discrepancy is believed to be a typo in the printed report that cannot be traced.

Table 11: Number of Births and Fertility Rates per 1,000 Women Age 15 to 44: 1950 to 2005

CDP refers to Census Designated Place

[1] The 1990 population totals for Beatrice, Bellevue, Cedar Rapids, Dixon, Elba, Falls City, Grand Island, Gross, Hartington, Herman, Lexington, Malcolm, Marquette, Niobrara, Omaha, Palmer, Papillion, Plattsmouth, Ponca, Rockville, Scottsbluff, Seward, Silver Creek, Thurston, Wakefield, and York are corrected counts. The Census Bureau issued corrected population counts for these areas after the original 1990 counts and associated data products were published. Other detailed population tabulations were not revised to reflect the corrections, so the final counts reported here will differ slightly from the population totals in other tabulations.

[2] Farwell formerly known as Posen.

[3] Garland formerly known as Germantown.

[4] Giltner formerly known as Huntington.

[5] Howard City also known as Boelus.

[6] Otoe formerly known as Berlin.

[7] The original 2000 Census count was revised for Beatrice, Hickman, McCook, and Peru. The revised count is listed. See note 1 also.
