Bakhtar News Agency
Afghanistan In The Past Fifty Years

Although this country had been under foreign domination before and after World War II, this is the first time it has been possible to maintain an independent, sovereign state.

In the years following World War II, Afghanistan was ruled by a military junta. The country was in a state of political and social chaos. The government was unstable, and the economy was in a state of collapse. The people were living in poverty, and the country was faced with a number of challenges, including a severe drought and a shortage of food.

In the 1960s, Afghanistan began to recover from the effects of the war and the chaos that followed. The government began to stabilize, and the economy started to improve. The people began to see a glimmer of hope, and the country began to move forward.

In the 1970s, Afghanistan continued to develop, and the country began to emerge from the shadows of war and chaos. The government continued to stabilize, and the economy continued to grow. The people continued to see a glimmer of hope, and the country continued to move forward.

In the 1980s, Afghanistan was faced with a number of challenges, including a civil war and a invasion by the Soviet Union. The country was once again in a state of political and social chaos. The government was unstable, and the economy was in a state of collapse.

In the 1990s, Afghanistan began to recover from the effects of the civil war and the invasion by the Soviet Union. The country began to stabilize, and the economy started to improve. The people began to see a glimmer of hope, and the country began to move forward.

In the 2000s, Afghanistan continued to develop, and the country continued to emerge from the shadows of war and chaos. The government continued to stabilize, and the economy continued to grow. The people continued to see a glimmer of hope, and the country continued to move forward.

In the 2010s, Afghanistan was faced with a number of challenges, including a civil war and a invasion by the Taliban. The country was once again in a state of political and social chaos. The government was unstable, and the economy was in a state of collapse.

In the 2020s, Afghanistan is once again facing a number of challenges. The country is in a state of political and social chaos, and the economy is in a state of collapse. The people are once again living in poverty, and the country is once again facing a number of challenges.

In the future, Afghanistan will need to overcome these challenges and move forward. The government will need to stabilize, and the economy will need to grow. The people will need to see a glimmer of hope, and the country will need to move forward.
Afghanistan In The Past Fifty Years

The government of Afghanistan, through establishing an environment of peace and stability and when the economy was expanding, has achieved a continuous rise in the standard of living of the people. It can be said that the government has worked hard in the last few years to improve the living conditions of the people by focusing on various aspects such as education, health, and infrastructure.

The New Order

By Habib Hashemi

In 1963, when the government was in power, the country was facing numerous challenges. However, the government was able to overcome these challenges and bring about a new order. The government was committed to the development of the country and worked hard to improve the living conditions of the people.

The government was able to achieve this by focusing on various aspects such as education, health, and infrastructure. The government was successful in establishing a strong educational system and improving the quality of education. The government was also able to provide healthcare facilities to the people and improve the standard of living.

The government also worked hard to improve the infrastructure of the country. The government was able to construct new roads and bridges, which helped to improve the connectivity of the country. The government was also able to develop the economy and bring about economic growth.

The government was able to bring about a new order in the country, which was characterized by peace, stability, and development. The government was able to achieve this by focusing on various aspects such as education, health, and infrastructure.

Her Majesty the Queen, members of the royal family, and our dear countrymen and they pray for the soul of the great national hero, His Majesty the late King Mohammad Nader, and other martyrs for freedom.**

Due to continual efforts of the Government and people of Afghanistan, under the guidance of His Majesty King Mohammad Nader, important roads and airports have been built throughout Afghanistan. To take advantage of these facilities, greater standards of services are coming to help the federal and beautiful area of this country. Although a number of holidays are in progress in the past few years, they do not meet all the needs of tourists. Now we see an international hotel is being built in accordance with international standards in this city.

Milano Plc Company has arranged a construction contract with Taylor Woodrow International Ltd, London to build a big, modern hotel on international standards as a first step. As well, the hotel will come up in Kabul, which helps to spread hospitality all throughout the country.

Construction work on the International Hotel on Bagram Road began in April 1967, and will be completed by the end of 1969. The seven-story international hotel will have 150 rooms each with private baths and service. It will have restaurants, a swimming pool and other modern facilities in accordance with international standards.

The hotel will fill one of the biggest vacancies for tourist hotels in this capital city. Wealthy nation from all over the world will have accommodations there and Ariana Afghan Airlines and other economic enterprises will benefit. Wealthy tourists who spend money want good hotels to stay in. Therefore the existence of a good hotel is a must in a developing country. Afghan hoteliers must be encouraged and supported.

Human factors naturally work together. Guests want to stay in bigger hotels and many best planned vacations from the International Hotel is situated in a beautiful city and the scenery is enviable. The hotel will double the charm of the capital city and will itself become a tourist attraction.

Pashamay Tejary Bank on the occasion of the 50th anniversary of the regaining of the independence of Afghanistan presents its sincere congratulations to His Majesty, the democratic protector of freedom and founder of the present reform movements, Her Majesty the Queen, the princes and princesses, His Royal Highness Marshal Shah Wali Khan, the conqueror of Kabul, other members of the royal family and the people of Afghanistan.

We pray for more prosperity for our dear countrymen under the benevolent and wise leadership of His Majesty. We pray for the soul of the martyred national hero and father of our independence, His Majesty the late King Mohammad Nader, and other martyrs of the war of independence.

The Pashamay Tejary Bank was established 53 years ago with an initial capital of Af 120 million. Now it has capital assets of Af 266 million. Similarly banking and commercial activities have expanded. The bank offers loans to increase export and support commercial firms and businessmen, especially those dealing in karakul pelts, wool, carpets and saltine.

To facilitate these operations even further, the bank has established letters of credit and sells foreign exchange and travelers' cheques of important banks.

People can open savings accounts at six percent interest. Students and even children can have such accounts up to a maximum of Af 180. To encourage people to save more, anyone with an Af 300 account is entitled to be a participant in the annual lottery.

The bank has branches in Jale Mawarand, Wazir Akbar Khan and in the Kabul Hotel. Safe deposit boxes are available for personal and valuable documents. The bank also offers loans against collateral such as jewelry and is authorized to accept and deal in all foreign exchange matters.

Pashamay Tejary Bank also handles freight ing through the Soviet Union, Iran and Pakistan.

Pashamay Tejary Bank is open in summer until eight p.m., in winter until seven p.m. and during holidays its branches in Zendawasi and the pavilion area are open from nine a.m. until nine p.m. The Kabul Hotel branch is open from seven a.m. to nine p.m. during holidays, from eight a.m. to nine p.m. in summer and from nine a.m. to seven p.m. in winter.

Pashamay Tejary Bank transfers afghanis or foreign exchange inside or outside the country. We have commercial and banking ties with the Bank of America, the Chase Manhattan Bank, the First National City Bank and the Banking Trust Company of New York, Westminster Bank of England, Deutche Bank of Hamburg, Commercial Bank of Italy, Swiss Bank Corporation of Geneva, Chase Bank of Chicago, Union Bank of the USSR, Hong Bank of Karachi and Peshawar and the Central and Export Bank of Japan.

Pashamay Tejary Bank also has branches in Herat, Kandahar, Farah and Kandahar and has offices in Bokhtar, Tabgharan, Terghundi, Khalil and in the USSR in Termez and Khodj.

Pashamay Tejary Bank also has an office in Paris, Hamburg and will soon open one in Japan.

Pashamay Tejary Company India Private in Ahmadabad and Pashamay Forwarding Company Ltd. in Karachi and Peshawar are helping Afghan importers and exporters.

The Anglo-Muslim Trade Centre was opened on 23rd May 1975 by the Prime Minister of Uganda and the Governor of Afghanistan.

There are now employed in the Trade Centre eight Afghan engineers working as staff, advisers, etc., who are taking increasing responsibility for day to day running of the business. A large part of the work elsewhere in Afghanistan is being done by local staff appointed from the Ministry of Commerce and Industry.

Mr. Isaac and Mr. Anderson have been on the scene of the opening. That means that the Afghan Government and British business have been in operation in Afghanistan. We are pleased to see that the Afghan Government has continued cooperation with the British business.

We are pleased to hear that the Afghan Government and British business have been in operation in Afghanistan. We are pleased to see that the Afghan Government has continued cooperation with the British business.

At The Time Of Its Independence Celebration.

There are now employed in the Trade Centre eight Afghan workers or staff, advisors, etc., who are taking increasing responsibility for the day to day running of the business enterprises. A large part of their work is the training of the Afghan staff, including Government Officers and Afghan businessmen who wish to import a wide variety of manufacturing goods. To a large degree the success of the enterprise will depend on the whole-hearted efforts of our Afghan staff.

Mr. Massal and Mr. Masoud have been busy since the opening of the Trade Centre, very much in the business and co-operation that have been organized by the Government of Afghanistan with whom they have had dealings, and on this occasion of Jashen, they would like to express their sincere congratulations to the Government Officers who have been in touch with them in their work in the Afghan Embassy on a visit to Britain and who have contributed to the very successful and happy outcome of the Trade Centre.

It is appropriate that in this 50th Year the Afghan-English Trade Centre would open its doors to the very end hope that it will be successful and giving service to the people of Afghanistan in the years to come. They would like therefore to join with the British Manufacturers and the people of this country in wishing the Afghan nation peace and prosperity in the coming years.

A Tour Of The German Pavilions

The interested visitor needs a good half hour to see everything that is on display in the German pavilion. Here, in an exhibition area of 2,000 m², an effort has been made to demonstrate the underlyng energy generation and distribution in an uncomplicated yet instructive manner.

In this exhibition, the visitor finds applications from the local point of the exhibits of the German participation, right at the main entrance on the western side: the visitor's attention is drawn to flashing approach lights for airports. This type of lighting is needed by airports for their take-off and landing runways—a field of special interest for Afghanistan's transport and communication.

The German exhibition makes frequent use of models to make industrial installations or mechanical processes understandable in large or media display. In one area near the central, a transformer station and a turbine are demonstrated with a true-to-scale model. The third path leading to the pavilions is pleasant to walk on and also protected from the sun.

In the entrance hall, the model German exhibition is thus the second pavilion in perfect order. Here the visitor finds models of circuit breakers and component motors and also various low-voltage-protective devices.

An object of special interest in this part of the exhibition is the transformer station with low-voltage section. In the operation, one can see transformers and two generating units. They are of sufficient high capacity to cover all the power requirements of the German participation.

At the top of the exhibition is an impression of a power supply installation. It is a demonstration setup which clearly illustrates how various types of plants are supplied with power. Another fine work in the section is the model of a steam boiler. It is a condenser boiler with hand-operated throttle and drum operating unit.

The path in the next pavilion was past the model of a diesel generating set. In this pavilion, the layout, demonstration area and operational equipment illustrate in simplified form a miniature of the applications of climate control systems. The path to the next pavilion was past the model of a control station. It is a demonstration setup which clearly illustrates the scheme of industrial automation systems and how various types of plants are supplied with power. Another fine work is the model of a steam boiler. It is a condenser boiler with hand-operated throttle and drum operating unit.

An object of special interest in this part of the exhibition is the transformer station with low-voltage section. In the operation, one can see transformers and two generating units. They are of sufficient high capacity to cover all the power requirements of the German participation.

At the top of the exhibition is an impression of a power supply installation. It is a demonstration setup which clearly illustrates how various types of plants are supplied with power. Another fine work in the section is the model of a steam boiler. It is a condenser boiler with hand-operated throttle and drum operating unit.

The path in the next pavilion was past the model of a diesel generating set. In this pavilion, the layout, demonstration area and operational equipment illustrate in simplified form a miniature of the applications of climate control systems. The path to the next pavilion was past the model of a control station. It is a demonstration setup which clearly illustrates the scheme of industrial automation systems and how various types of plants are supplied with power. Another fine work is the model of a steam boiler. It is a condenser boiler with hand-operated throttle and drum operating unit.

The visitor to the German exhibition can thus reach the second pavilion in perfect comfort: here he will find models of circuit breakers and component motors and also various low-voltage-protective devices.

SIEMENS, AFGHANISTAN LIMITED

A Tour Of The German Pavilions

The interested visitor needs a good half hour to see everything that is on display in the German pavilion. Here, in an exhibition area of 2,200 sq. m., an attempt has been made to demonstrate the order of energy generation and distribution in an uncomplicated yet instructive manner.

In fact, electricity and its possible applications from the local point of the exhibits of the German participation. Right at the main entrance on the western side the visitor's attention is drawn to a flaming approach light for airports. This type of beacon is needed by airports for their take-off and landing runways—a field of topical interest for Afghanistan's transport.

The German exhibition makes frequent use of models to make industrial installations or mechanical processes understandable to a large public as possible. In the very first pavilion at the main entrance, a transformer-power station and a turbine are demonstrated with a tramway type model. The third path devoting the pavilion is pleasant to walk and also protected from the sun. The extensive open-air area is devoted to movement of water and industrial television system enables the viewer to observe himself in motion. A gag repeatedly proved a great attraction for the public at exhibitions all over the world.

The visitor to the German exhibition can thus reach the second pavilion in perfect comfort: here he will find models of circuit breakers and in-mounted motors and also an original low-voltage switchgear cabinet. Here the next pavilion runs past the model of a diesel generating set. In pavilion 5, models, demonstration sets up instructive manner. In fact, electricity and its possible applications form the focal point of the exhibits of the German participation. Right after pavilion 5 the visitor needs a good half hour to see everything that is on display in the German pavilion. Here, in an exhibition area of 2,200 sq. m., an attempt has been made to demonstrate the order of energy generation and distribution in an uncomplicated yet instructive manner.

Come and see the German Pavilion in the Jashn grounds.

On the happy occasion of Jashn-i-Isteqlal PIA shares the joy of the people of Afghanistan

THE INDUSTRIAL OFFICE OF IRAN IN KABUL OFFERS ITS

SINCERE CONGRATULATIONS TO THE PEOPLE AND GOVERNMENT OF AFGHANISTAN ON THE 50th ANNIVERSARY OF REGAINING THEIR INDEPENDENCE AND WISHES THEM MANY HAPPY RETURNS OF THE DAY.
FARYADI FUR TAILORING INSTITUTE OFFERS ITS SINCEREST CONGRATULATIONS TO ALL THE PEOPLE OF AFGHANISTAN ON THE OCCASION OF THE 50th ANNIVERSARY OF REGAINING OF INDEPENDENCE AND WISHES THEM AND AFGHANISTAN FURTHER PROGRESS AND PROSPERITY.

The Faryadi Fur Tailoring Institute makes hand tailored overcoats for men and 안 가, women's jackets, handmade handicrafts and cloths, for shoes, hat blankets and variety of selected handwoven mats in beautiful colours. We keep ready to accept orders. Our services have been so much in demand that we have had to increase our staff from 10 workers to 35, and the West Germany embassy.

On the basis of these observations he formed his institute, "ARIANA" to increase passenger comfort and the specific provision for cargo load. You will remember that the latest development and technical improvement has been built into this aircraft by BOEING and "ARIANA" requested even further special provision for cargo load. You will remember that "ARIANA" is the first to have the new BOEING 727 in the public service.

The debut of "ARIANA" in London, Peshawar, Lahore, Amritsar, New Delhi, Tashkent and Moscow, you may travel with "ARIANA" for reservations on the New Swift Luxurious Aircraft.

SINCERE CONGRATULATIONS TO AFGHANISTAN ON THE HISTORIC OCCASION OF THE 50th ANNIVERSARY OF HER INDEPENDENCE.
Afghan Karakul

Wrapped in legend and until recently almost inaccessible to the outside world, Afghanistan has produced many of the world's finest pelt. The Karakul is made from the skin of a sheep that has been fed and raised in the high-altitude mountains of the country. The skin is then treated with a special process to give it a luxurious sheen and a rich, deep color.

The Black skins, which have undergone a rejuvenation, emerging with a new type of skin and with added value added. Golden Brown (Sur) and Silver (Shes) are natural, light-colored skins. Each a credit to Afghanistan, each an important contribution to the world's fur supply.

The finest Broadtails, too delicate for manufacturing other than by hand through the gentlest of brushing, a hand-touched process, is a testament to the care and attention given to each skin. The skins are carefully raised sheep, a rarity value attaches itself to any garment made from them.

Here in these fairy-tale surroundings, where the wilderness meets the modern, the output of carefully raised sheep, a rarity value attaches itself to any garment made from them.

So, when choosing your next Karakul, Lambskin jacket, suit or coat

Look for the label...
the luxurious beauty of Afghan Karakul

Wrapped in legend and until recently almost inaccessible to the outside world, Afghanistan has poured many a poet, painter and journalist in its tracks to explore the mysteries of this land. Two centuries of colonial independence, its fascination continued undiminished. These native sheep, with a high, thick-legged herdsman, spun a web of fantastic tales and legends. To this ancient Narrative spinning along the hallowed trade routes organized by the nomadic Persians.

To the Black skins, which have undergone a rejuvenation, emerging with a new life and re-awakened the sky herding men as Golden Brown (Sur), Beige (Silver Grey), chestnut in Afghanistan, each an important contribution to the world’s fur supply.

The finest Broadtails, too delicate for manufacturing other than by hand through the traditional back-harnessing skills, can be found in the annual crop of 2 million skins. And due to this restricted output, a rarity value attaches itself to any garment made from them. Now in these fancy-schmancy fabrics, ultra-modern scientific skills are being combined with experience of the age to produce Broadtail Karakul Persian Lamb coats of unprecedented beauty. Once a commodity of small, tight curls, selective breeding has now developed a wide range of hair patterns in a variety of colours. To the Black skins, which have undergone a rejuvenation, emerging with a mirror gloss and renamed Noir d’or are added Golden Brown (Sur), Beige (Silver Grey), each a natural phenomenon.

HIS MAJESTY OPENS JASHEEN
Military Parades With Rocket, Tank, Anti-Aircraft Units

Mr. Haq, the President of the Supreme Court of the USSR, was present at the ceremony of the opening of the JASHEEN International Exhibition.

Prior to the attainment of national independence, our economy was in a state of stagnation, and the country was dependent on foreign trade for its survival. However, with the help of the government and the people of the country, we have been able to achieve economic self-sufficiency and become a self-reliant nation.
