Balanced Development Envisaged

Pre-Fab Housing Factory

KARLIS TIMES

April 16, 1962

The Prime Minister, in his Speech yesterday, said that the most important task for the Government in the next two years was to ensure balanced development. He emphasized that while rapid industrialization was necessary, it must be accompanied by agricultural development and social progress.

The Prime Minister also highlighted the need for better education, health, and housing. He said that the Government would provide more resources for these areas to ensure that all segments of society benefited from the development process.

The Prime Minister ended his speech by expressing confidence in the country's future and its ability to achieve balanced development.

The Weather

Washington, Apr. 16. (UPI) - The United States received another prediction of unsettled weather today, as officials at the National Weather Service forecast a pattern of scattered showers and variable temperatures throughout the country.

More Pakistanistani Leaders Jailed By Pakistan Government

KARLIS, Apr. 15.—Three more Pakistanistani leaders were arrested today, according to official sources. The leaders were arrested as part of the ongoing crackdown on opposition figures.

The leaders arrested today are: Mr. K. A. Ahmad, Mr. M. A. Khan, and Mr. H. M. Ansari. They are all members of the opposition party and have been critical of the government.

Preservation Of Gudino's ULTIMATUM TO POLITICAL PARTIES

HERCULES AGER (Reuter), April 15—A new deadline has been set by the caretaker government in Portugal for political parties to accept its ultimatum.

The government has given the parties until April 20 to accept its demands for the establishment of a democratic government. Failure to accept the ultimatum will result in further martial law.

The government's ultimatum includes demands for the disbandment of the former regime's security forces, the release of political prisoners, and the establishment of a new government that is answerable to the people.

Results of First Plan: The Press and Radio

Sardar Daoud’s Analysis

At a glance

We are looking forward to the presentation of the results of the first plan which will be delivered to the National Assembly and the people of Afghanistan on April 15. At this point, we would like to present our views on the impact of the first plan on the national development of Afghanistan.

The first plan was formulated and approved by the National Assembly in 1961. It aimed to bring about economic growth and development in various sectors of the country. The plan was designed to be implemented over a period of five years, from 1961 to 1966.

The plan included a number of specific objectives, such as increasing agricultural production, improving education and health services, and expanding infrastructure. It was also intended to create job opportunities and improve living standards for the people of Afghanistan.

The implementation of the first plan has been a significant milestone in the development of Afghanistan. It has contributed to the economic growth of the country, and has helped to improve the living standards of the people.

We believe that the first plan has been a success, and we are looking forward to the presentation of the results of the second plan, which will be delivered in the near future.

Metric and Decimal System in Afghanistan

BY M. MAHMOOD

Afghanistan is a country located in the heart of Asia, with a rich cultural and historical heritage. The country is known for its beautiful landscapes and diverse wildlife. Afghanistan is a member of the United Nations and is also a part of the Central Asia region.

The metric and decimal system is the official system of measurement used in Afghanistan. It is based on the metric system, which is used in most countries around the world. The metric system is based on units of length, mass, and volume, and is used in all fields of science and engineering.

The metric system is based on the meter, kilogram, and liter. The meter is the basic unit of length, and is defined as the distance traveled by light in a vacuum in 1/299,792,458 of a second. The kilogram is the basic unit of mass, and is defined as the mass of a certain platinum-iridium cylinder kept at the International Bureau of Weights and Measures in France. The liter is the basic unit of volume, and is defined as the volume of a cube with sides of 10 centimeters.

The metric system is widely used in Afghanistan, and is taught in schools and used in everyday life. The system is easy to use and understand, and is a valuable tool for scientific and engineering applications.

In conclusion, the metric and decimal system is an important part of Afghanistan's cultural and historical heritage. It is a valuable tool for scientific and engineering applications, and is widely used in everyday life.
