Bunche To Investigate Political And Military Situation In Congo

NEW YORK, Oct. 22 (Reuter) - Dr. Ralph Bunche, United Nations mediator in the Congo, arrived yesterday to investigate the political and military situation in Congo on behalf of U.N. Secretary-General Dag Hammarskjold. Dr. Bunche's visit is the first of his three-month stay in the Congo, during which he will try to find solutions to the problems of the Congo.

Dr. Bunche's visit is expected to be significant in the Congo crisis, as he has a reputation for his mediatory skills and his ability to find solutions to complex problems. His arrival comes at a time when the situation in the Congo is becoming increasingly tense, with a number of clashes between the Congolese army and various armed groups.

In a press conference yesterday, Dr. Bunche said that his main objective was to meet with all parties involved in the conflict and to try to find a solution to the crisis. He also expressed his concern about the safety of the Congolese population and the need to protect them from violence.

Dr. Bunche's visit is expected to be supported by the United Nations, which has a mandate to mediate the conflict in the Congo. The United Nations has been active in the region, providing humanitarian aid and trying to find solutions to the conflict.

In addition to Dr. Bunche, the United Nations has also sent a team of experts to the Congo, including a group of military observers and a group of political experts. These experts are expected to provide advice and support to Dr. Bunche during his visit.

Dr. Bunche's visit is expected to be a key moment in the Congo crisis, as it will determine the future of the United Nations' role in the region. The United Nations has been involved in the Congo crisis for several years, and it is unclear how much more it can do to help resolve the conflict.

The United Nations has already provided humanitarian aid to the Congolese population, but it is unclear how much more it can do to help the Congolese government to find a solution to the conflict. The United Nations has also been criticized for its lack of action on the Congo crisis, and it is unclear how much more it can do to help the Congolese government to find a solution to the conflict.

In conclusion, Dr. Bunche's visit is expected to be a key moment in the Congo crisis, as it will determine the future of the United Nations' role in the region. The United Nations has already provided humanitarian aid to the Congolese population, but it is unclear how much more it can do to help the Congolese government to find a solution to the conflict. The United Nations has also been criticized for its lack of action on the Congo crisis, and it is unclear how much more it can do to help the Congolese government to find a solution to the conflict.
