Castro Opposes U.N. Inspection Of Dismantling Of Bases

Thursday evening the Cuban Premier, Fidel Castro, expressed grave opposition to a United Nations inspection of the disarmament of Cuba's armed forces if this was not done by the revolutionary government itself. Mr. Castro could not accept any inspection, he said, since the inspectors would consider Cuba disarmed. The Castro government has already rejected a similar inspection of its disarmament by the United States for the reason that it would be considered as an occupation force. Mr. Castro is reported to have said to his aides on Saturday night that he would not consider the United Nations inspection as a threat to his government.

U.S. Arm's Begin Arriving in India

The first flight of U.S. military personnel arrived in India on Saturday night to set up a technical co-operation mission. The flight consisted of 10 airmen and 20 technical assistants who would establish a technical co-operation mission at the headquarters of the Indian Air Force in Bangalore.

The conference, attended by 44 German diplomats, ended in Berlin on Saturday, with a resolution calling for the reunification of Germany.

Ben Bella Opposes Nuclear Tests in Sahara

NASSER, January 4, 1964

The President of Libya, Ben Bella, has strongly opposed the testing of nuclear weapons in the Sahara Desert, saying that it would be a serious threat to the region's environment and economy.

Afghan Pioneers

For Soviet Union's 20th Anniversary, a group of Afghan pioneers arrived in Moscow to celebrate the 20th anniversary of the Soviet Union. They were welcomed by the Soviet authorities and were given a tour of the city.
**Soviet Mars Probe May Provide Answers To Puzzling Questions**

The Soviet Union has launched a Mars probe, which is expected to reach the Red Planet in about six months. The mission is part of the space exploration program aimed at understanding the nature of Mars and its potential for supporting life. The probe will analyze the surface composition and search for signs of water or organic compounds that could indicate the presence of life.

**Steady Improvement of Telephone Communications**

Steady improvements are being made in telephone communications. The latest advancements include enhanced data transmission rates, better connectivity, and increased reliability. These improvements are crucial for businesses and individuals who rely on reliable communication networks for their daily operations and personal interactions.

**Homing Sense Of Animals**

The homing sense of animals, such as bees and birds, is fascinating. For example, bees have a remarkable ability to find their way back to the hive after foraging. They use a combination of visual cues and the earth's magnetic field to navigate. This instinctive knowledge is an example of how animals can adapt to their environment and use their senses to survive.

**Political Committee of the South African No-Communist League**

The political committee of the South African No-Communist League has issued a statement against the South African government's policy of apartheid. The committee calls for an end to racial segregation and discrimination, and for a just and equal society for all South Africans.

**Land Of Zimbabwe**

Zimbabwe has undergone significant changes in recent years. Under the leadership of Robert Mugabe, the country has faced economic challenges and political upheaval. Despite these difficulties, Zimbabwe has made strides in education, health care, and economic development. The future of the country will depend on the ability of its leaders to address these challenges and ensure a better quality of life for its citizens.
The current political situation in Rhodesia is tense and volatile. The government continues to face significant challenges, including internal strife and external pressure. The opposition movement, led by Mugabe and his allies, remains strong and is committed to achieving its goals, which include the establishment of a government that represents all citizens equally.

The economy is struggling, with high inflation rates and a shortage of basic commodities. The, political instability has contributed to the decline of the economy.

The situation in the region is complex and multifaceted, with various actors involved, including local and regional governments, international organizations, and non-governmental organizations.

In conclusion, the political situation in Rhodesia is critical, and efforts are needed to address the underlying issues and bring about a peaceful resolution.
