New S. African Boxing Champion

JOHANNESBURG, Jan. 21 - The British South African Swiss heavyweight boxing champion, E. M. Shepstone, knocked out the Dutchman, J. Schouw, in the seventh round round of their world title fight here yesterday.

Research organizations and scientific institutions will develop their activities in order to promote science and technical progress. Coordinated research will be carried out in a number of countries, and international cooperation is aimed at.

The need for development of scientific research in the country was considered necessary in order to ensure that the country's economy is self-sufficient and that the country can become a leading scientific power.

The government has announced that it will allocate a significant amount of money to the development of scientific research in the country.

Saving Talks On U.K.'s Kabul News In Entry Into E.C.M.

COMPROMISE GERMAN FORMULA

BEING DISCUSSED

BRUSSELS, Jan. 20, (Reuter)—Mr. Edward Heath and the German Chancellor, Mr. Ludwig Erhard, met here last night for talks at which authoritatively sources said that specific negotiations on Britain's entry into E.C.M. were being discussed.

Mr. Heath is here for the two-day meeting of the E.C.M. but the German Chancellor is on a West German tour which has been extended for two days.

Mr. Heath will also meet President de Gaulle before leaving for Brussels for a meeting of NATO leaders in which the question of the United States' participation in the defence structure will be discussed.

The meeting comes at a time when the West German delegation is expected to arrive here to give the Brussels group their thought on the new E.C.M. formula, which British diplomats believe is a vital point in the whole negotiations process.

The meeting is being described as a "rounding-up"

German-made diesel slave; very economical and healthy. No smoke. Consumes less than a gallon in a month.

Address: 84 Industrial Sales Shop, 1st. section of Jodha Pahalam.

Ban Talks

Constitutional Talks Open In London

WASHINGTON, Jan. 20, (AP)—The United States officials on Tuesday confirmed reports from the United States that the United States had agreed to attend the Swaziland constitutional talks, which are expected to begin later this month.

The United States officials confirmed that the talks would be held in London, and that the United States would be represented by a high-level delegation led by Assistant Secretary of State Robert MacNamara.

The Swaziland constitutional talks are expected to address issues such as the creation of a new constitution, the role of the monarchy, and the future of the country.

U.S. Unaware of de Gaulle's "Grand Design"

WASHINGTON, Jan. 20, (AP)—The United States officials confirmed on Tuesday that they were unaware of a report that President de Gaulle was planning a "grand design" for Europe.

The officials said that they had no knowledge of any such report.

The report came from French sources, who said that President de Gaulle was planning to create a new European union that would be separate from the European Union.

U.S. officials stressed that they were not aware of any such plans and that the United States remained committed to supporting the European Union.

Mars Shot Half Way To Planet

WASHINGTON, Jan. 20, (AP)—The United States space agency announced on Tuesday that it had launched a spacecraft to Mars, which will make the first direct approach to the Red Planet.

The spacecraft, named "Mars Express," was launched from Cape Canaveral, Florida, and is expected to arrive at Mars in November 2003.

The mission is part of a major effort by the United States to explore the Red Planet and to search for signs of life.

The spacecraft will study the planet's atmosphere, surface, and subsurface water, and will also search for signs of past or present life.

The mission is expected to cost about $1 billion and will take about two years to complete.

The spacecraft will land on Mars in November 2003, and will begin transmitting data back to Earth.

The data will be used to study the planet's climate, geology, and potential for life.

The spacecraft will also study the planet's atmosphere and magnetic field, and will search for signs of past or present life.

The mission is expected to provide valuable information about Mars and its potential for life, and will help to guide future missions to the planet.

U.S.A.'S 1962 SPACE PROGRAMME

MOST SUCCESSFUL SO FAR

WASHINGTON, Jan. 20, (AP)—The United States space agency announced on Tuesday that its 1962 space programme had been the most successful so far.

The programme, which was launched in August 1962, was designed to test the United States' ability to send a spacecraft to Mars and to return a sample of the planet's surface.

The programme was considered a success, as the spacecraft successfully completed its mission and returned valuable data.

The spacecraft was launched from Cape Canaveral, Florida, and was expected to arrive at Mars in November 2003.

The data was used to study the planet's climate, geology, and potential for life.

The spacecraft also studied the planet's atmosphere and magnetic field, and searched for signs of past or present life.

The mission was expected to provide valuable information about Mars and its potential for life, and to help guide future missions to the planet.
