NATO-EAST EUROPEAN NON-AGGRESSION PACT MAY BE GOOD FOR U.S.
George Kennan's Comments
WASHINGTON, Aug. 16 (AP) - George F. Kennan suggested Tuesday that a non-aggression pact between the United States and the nations of Eastern Europe would be good for the United States if it is not to lead to other agreements with Soviet Union and its allies.

Kennan, who recently returned to the State Department, where he is a member of the Foreign Policy and Disarmament Policy Group, said he agreed with President Harry S. Truman's decision to oppose the pact.

"The American public has powerfully asserted its approval of the President's stand," he said.

Kennan, who was a member of the Foreign Policy and Disarmament Policy Group for many years, said the United States now has real power in world affairs and that it is the only country in the world that has the power to dictate the terms of a non-aggression pact with Eastern Europe.

"The United States has the power to dictate the terms of a non-aggression pact with Eastern Europe," he said.
