For Goldwater To Say

Say He Will Run

WASHINGTON, Sept. 28, (AP)—U.S. Senator Barry Goldwater, considered a strong possibility for the 1964 Republican presidential nomination, said today that middle or late January would be a good time for him to announce whether he will seek the nomination.

The Arizona Senator acknowledged that unless the nuclear test ban treaty passed, or the Senate last week, might hurt him in a political campaign, but he explained his reasoning this way in a taped radio interview:

"I'm convinced a large yield, 300,900 megaton, detonated at or higher over it's country, could put our communications systems and perhaps some of our own...I've felt we had to have a good reason to learn about this...I've convinced the Russians the answers to the questions.

Senator Goldwater discussed at some length the possibility that the antigen about Aug. 3 that suggests a great many might have been nuclear in origin, and said it as a volcanic eruption or collapse of a huge iceberg.

"I think I can say that I believe that the United States sent ships to that area to collect ore to determine if it was a radioactivity emanations...But to the basic statement I have heard nothing offically saying that it was not a nuclear-yield explosion.

He said the matter was kept so secret that "I was prevented from asking the Senate Foreign Relations Subcommittee. He added he was convinced, however, the disturbance was caused by a volcano.

The U.S. Atomic Energy Commission has said it has no evidence of a nuclear explosion, which he said could have been perceived if it occurred during a treaty deadline under way.

Senator Goldwater also said it "physically impossible for Congress to stop the administration's civil and tax researches, or the time remaining in this session.

lot machines in and bailing. His best years were when he piled up 150,000 dollars selling black market ration coupons during World War II and "I had to go and get on a bailing stamp."

He received no help from Cosa Nostra when he started out on his own with the law, he said. He had to hire a lawyer, and his own bondsman.

The only protection the organization afforded was from other mobsters and their rackets. When this happened, he was told, a few of his associates immediately invoked the iron discipline of the organization and corrected the situation.

And what did Valachi do in his turn for Cosa Nostra?

"He got out and kill for them," he said.

Nuclear Weapons

"Many of these things will take long negotiation," Mr. Stev- enson went on. "They may have to be referred back to Ge- neva (the Disarmament Com- mittee) and we may altogether agree to refer the problem to the General Assembly for future consideration and inspection and the West could not accept this..." Stevenson had said there had been no formal President Charles de Gaulle's "special" summit meeting with Malania Prime Minister Tunku Abdul Rahman. He said he had refused to meet with the two opponents of Malaysia.

In Jakarta, the official Indonesian News Agency Antara reported 10,000 volunteers are ready for shipment to the Indonesian States bordering the two Malay States.

In contrast to these moves, In- donesia's first Deputy Foreign Minister, Soe, told newsmen in Jakarta the Indonesian Government considers the possibility of a second major military conference to solve the Malaya problem.
